Subject: Appendix B: Archaeological Sensitivity Maps for just emailed Comments for Selectmen's meeting of Sept 12 on Nagog Pond water treatment plant proposal.

Acton Selectmen and Town Manager:

Attached are the 2 maps of Archaeological Sensitivity for Acton (from Acton's own PAL study in 2008). They were to accompany the recently sent Comments to Selectmen for Monday's September 12th Public Hearing, They are large files and may not make it through everyone's email servers. A hard copy of the full set of comments and maps will also be hand delivered to the Town Manager's Office.

As a supplement to the comment letter I am also attaching a 2 page locus map for components to the Water Treatment Plant to facilitate reading the previously sent Comments.

Hope that this helps in better understanding the Friends of Pine Hawk's Public Input Comments for Monday night's (September 12th, 2016) Selectmen's Meeting.

Thank you for the opportunity to comment.
Don MacIver, Member of Friends of Pine Hawk

Dear Selectmen,

Please accept this public input from members of the Acton-based Friends of Pine Hawk for consideration at your September 12 meeting on the on Nagog Pond water treatment plant proposal.

The signers of this letter believe that the treatment plant proposal, in its current form, is simply inappropriate for its proposed location at the current Nagog Pond pump house site. It is an oversized industrial type operation positioned on the far side of a residential neighborhood solely serviced by private roads. In its complete reconstruction, this proposed development expands its facility and unnecessarily concentrates industrial type operations, some now performed remotely, in a very sensitive area for open space and with new impacts to residential neighborhoods and lands with high potential for archaeological resources.

Respectfully, Bob Ferrara
