Subject: Acton Gas & Service

Walter:

In following-up on our conversation this afternoon in the subject regard, I find that the petitioner had originally come in requesting a license to display two (2) cars for sale, on-site. Garry told him that would violate the Zoning Bylaw. He then decided to ask for a non-display instead. Nothing else in the packet, except for Christine's handwritten note on the top of the application, suggests a non-display license. The application says he wants to display two vehicles for sale; the sketch shows where they would be located; the add is simply for a Class 2 License; and , with the exception of Garry's memo, staff's comments make reference only to a Class 2 License.

Nothing from the petitioner says he wants a non-display license. Indeed, the record all goes the other way. As a result, I have asked Christine to contact the petitioner and tell him we are going to have to cancel this hearing and start over again.

Regards,
Don
