

11/17 (E)

Memo

To: Board of Selectmen
From: John Murray
Date: November 14, 2003
Re: Commuter Lot

In response to complaints, over a month ago the Chairman asked staff to investigate the reallocation of approximately 10 meters to residential parking. Attached Board members will find:

- An existing conditions plan of the lot
- Vacancy rates of both the residential and meter areas
- A plan which expands the number of residential spaces by ten
- A plan which expands the number of residential spaces by 12
- A plan which expands the number of residential spaces by 14

Staff believes the 14 space reallocation plan is best because it allows for a uniform demarcation line between the meter area and the residential sticker area of the lot.
