Re: Request that the replacement culvert at 420 Great Road be the same circumference as the existing culvert

Regretfully, we are not able to attend the October 7th Conservation Commission review of the Notice of intent referring to the replacement of the culvert at 420 Great Road (Wills Hole). We are expressing concern that any changes to the existing culvert may impact our property at 416 Great Road, Acton and specifically our business, Le Lyonnais Restaurant, at that address.

Changes to the adjacent property's drainage, in the past, seem to have impacted our property. We believe that the "rainfall drain" from the property at 420 Great Road to Wills Hole that was placed there a few years ago, has raised the water levels of the portion of Wills Hole which is on our property at 416 Great Road. We would like to ensure that the proposed culvert repair will not negatively impact our business and property. We would like the Commission to address our concern that the culvert, which is being repaired/replaced, be of the same circumference as the existing culvert.

Respectfully,

Gerard and Joan Labrosse
Owners, Proprietors
