To: Planning Dept.  
From: Justin T. Snair  
Re: **Rev. of Definitive Subdivision Plan – Michele Circle**  
Date: 05/10/10

The Health Department has reviewed the **Revisions of Definitive Subdivision Plan – Michele Circle** and has the following comments:

1. Soil suitability in accordance with 310 CMR 15.102 has not been determined at the proposed primary and reserve disposal areas.
2. No reserve area has been indicated for either proposed single family home in accordance with 310 CMR 15.248 (1).
3. An existing leach field is indicated on the plan, which is intended to serve a new single family home. It is the Health Departments understanding that the indicated disposal area was removed during site grading.
