Acton, MA 01720

To Whom It May Concern,

The plots created by Aerial Spectrum contained herein were created by overlaying propagation maps (received from SBA) over the Town of Acton's and the Town of Concord's Geographic Information System (GIS) maps.

First, the base map was created by capturing images from the town GIS systems and bringing them into Adobe Photoshop. Many separate images were needed to complete the base map for the proposed project area; these separate images were overlaid and pieced together to make one contiguous base map. Next, the propagation maps were brought into Photoshop, scaled and aligned with the base map created. The shaded coverage areas were traced/copied on separate layers in Photoshop and eventually made opaque to provide visibility of the underlying base map. Text, titles, coverage circles and arrows were then added to complete the final image. The accuracy of the maps contained herein reflect the accuracy of the propagation maps and the available GIS maps utilized for these plots.

Respectfully Submitted,

Eamon Kernan, P.E.
