Nina--

The HDC discussed your 3-flue chimney at the meeting last night, and concurred that if you can get away without a cap, that would be what we would recommend. The tops of the flues are very low and can barely be seen, while any kind of cap would be quite prominent. The 2 architects also seemed to think that a cap might actually cause problems by impeding the draft, etc.

Your place is looking great. Have fun skiing!
