Subject: Caouette-Simeone Farmland Parking

Hello,

I wanted to follow up on email to the meeting last night which. Avelino and I live at 14 Maple and are deeply upset about any parking lots built on the Caouette farm land. We are hoping that any plans for parking will be eliminated if the Montourri land is purchased.

There has been discussion that Silvia Street to have some trail parking...sharing the load with another neighborhood. How is the town going to make sure these spots don't become commuter parking lots. We already have to deal with the MBTA across the street and now with possible parking out back this is going to present a lot of noise, car doors slamming, lights, car horns , etc.

I would also like to include our preferred option for the rail trail once it hits the farm - we would vote for straight shot across field (where tractor road is) , NOT voting for rail trail right next to rock wall abutting our property against the farmland. With proposed parking in front of our houses (and on at least one side of yours) ...please keep back wall a bit private.

Thank you for your consideration in this matter. It is a shame to think this beautiful land would become a parking lot.

Avelino & Patricia Miguelez
