I have attached a copy of the plan that was done in 2009. The Senior Center Committee is currently updating the document with the latest demographics and updated cost estimates. The committee is focusing on the third alternative - build new - since that was the clear direction given in 2009.

The Chief checked the cost estimate for the Fire Station concept and gave me that information but no plans. Similarly, I didn't see any plans for the previous senior center concept.

Do you have copies of the proposed plans for the North Acton Fire Station and the Senior Center?

The Senior Center proposal was developed several years ago and we are currently updating the numbers but it gives a place to start from.

The North Acton Fire Station proposal also had hard numbers but the 2020 plan isn't going so far as to say that we have to build one. Just that we should ensure that public safety is provided for Acton residents with appropriate response times throughout town. There are multiple ways to do that and the 2020 committee doesn't need to say which is the best way.
