---

Dear Kim,

The Sidewalk Committee met last night and we discussed the proposed development, Duggan Farm. We have a couple of questions:

1. From what we can tell from the plans, there will not be any sidewalk built within the residential compound. Is that correct?
2. It looks like the developers plan to build a sidewalk from Duggan Way's driveway entrance, up Arlington Street (toward W. Acton Center), and connecting several houses up to the existing sidewalk on Arlington Street, correct?
3. The design of the sidewalk will be a Cape Cod berm with bituminous concrete/black asphalt walkway, correct?

The Sidewalk Committee would like to submit its request that the new sidewalk portion be built of the same materials as the sidewalk section that it is connecting to. It appears that this is the intention for these construction plans.

We look forward to your confirmation. Thank you so much for your assistance.

Sincerely,  
Bettina Abe  
Sidewalk Committee Co-Chair
