Mr. Doug Halley
Town Of Acton
Conservation Commission
14 Forest Road
Acton, Massachusetts 01720

Dear Doug,

Per our telephone conversation last week, I am writing to request that the Commission consider allowing me to plant grass seed and spread lime on the field adjacent to our barn. If the Commission has any preference for a particular type of seed to use, please let me know.

I would also like to replace broken boards in the fence separating the front and back fields with 2x6's rather than 1x6's which break too easily. I also plan to paint the boards an off-white color to protect them from weathering.

Thank you once again for your help, Doug. Please let me know if the Commission has any questions about my plans. I am looking forward to working with you to keep our Conservation Lands clean, open, and beautiful.

Sincerely,

Rita McConnon
