Acton, MA 01720

FILE COPY

Dear Rita,

The Conservation Commission voted in their meeting of May 21st. to allow you to replace any broken 1x6's with 2x6's. Painting the new boards an off-white color is also acceptable to the Commission.

The Commission also agrees that the field adjacent to the barn is in need of new grass seed and lime and would approve you doing that work. As to the type of seed used, the Commission would defer to your judgement. If you are unsure, we would suggest that you consult with Dean Charter, the Director of Municipal Properties.

I will be getting in touch with you before the Girl Scouts begin cleaning the woods adjacent to the front fields so that we can arrange a proper place to pile the brush. Having worked with you in the past to resolve problems with the lease, I look forward to continuing work with you so that the interests of the Commission, the Town and yourself are always represented.

Sincerely,

Doug Halley
Conservation Administrator
