8:05 AM Commissioners and Chuck Caron counted 25 trees that were removed from the property within the 100' buffer zone; Mr. Caron also recorded the diameter of tree stumps and general locations, and will include the information with his report.

The Commissioners, Mr. Clark and Ms. Brenninkmeyer also inspected the area at the right front (northeast) corner of the house to see four additional white pine trees that the Kelleys would like to remove out of concern that they might fall on the house.

At the request of Commissioners, Mr. Caron took photographs of the tree removal areas. Mr. Caron will submit a report to the Commission based on his observations.

9:00 AM On-site meeting concluded.
