Hello Commissioners:

Here is a photo and some feedback from longstanding LSC member Bob Guba. This may be helpful in advance of your site visit to Hybid, and as background to your further discussion of the issues there.

Hi Bob:

Thank-you for passing this aerial view on, and for your thoughts. The ConsCom is in the middle of learning about and addressing this issue, so this data will be helpful.

-Jim

While looking at Google Earth yesterday regarding my hike through Nagog Hill I was shocked at the complete destruction of the ground vegetation on the conservation land behind Hybid Farm due to the McConnans disregard of their agreement with the Acton Conservation Commission. It's as bad as the destruction seen from the trail of the conservation land to the west of their barn, an existing situation for the past several years.

Bob
