RE: Resource Area Delineation Plan  
**Revision Date: December 7, 2011**  
366 Pope Road

Dear Commission Members:

In response to comments received during the site walk with Commission members as well as a letter from Oxbow Associates, Inc., dated December 6, 2001, the referenced plan has been revised. Revisions include the following:

- 1) The wetlands to the west have been identified as "Bordering Vegetated Wetlands" subject to the Wetlands Protection Act due to an identified stream channel within the wetland.
- 2) Three stream channel segments, Bank only, have been located. Segment 1 connects the intermittent stream within the western BVW to drain outlet pipes within the stone sump. Segment 2 is within the ornamental feature in the middle of the site. The last Segment 3 is from the stone headwall outlet to the fence of the paddock area where the Bank ends as determined by the Commission prior to the grass swale upgradient of WF 1-6 which has been determined during the site walk to not be a regulated area.
- 3) The 100' Buffer Zone has been adjusted accordingly.

Thank you for your attention to this matter, we look forward to discussing these revisions at the public hearing. Please contact our office if there are any questions.

Respectfully,  
Stamski and McNary, Inc.

Richard J. Harrington, P.E.

Joseph March, P.E., P.L.S.
