

25% Design Water Quality Data Form

1 Location of Project

Street(s) (and/or site name):	Assabet River Rail Trail		
Project Number:	604531		
City:	Acton		
County:	Middlesex County		
State:	MA	Zip:	
District Number:	3

2 Who will have final ownership of the road or bridge this project is addressing?

Town of Acton

Receiving Water Body Information

Answer the following questions on the stormwater receiving water body and send this form to the MassDOT Environmental Section at the 25% design stage.

3 Does runoff from the site enter a separate storm sewer system (MS4) operated by another organization?

No

[Click Here for Instructions](#)

5 Receiving water body name:

Fort Pond Brook

[Click Here for Instructions](#)

6 What is the receiving water body's segment ID?

MA82B-13_2008

[Click Here for Instructions](#)

7 What is the stressed basin classification in the project area?

Low Stress

[Click Here for Instructions](#)

Receiving Water Body Name:

Fort Pond Brook (8246850)

Confirm that this waterbody name is for the project's receiving water body. If not, confirm that the water body segment ID is accurate

Receiving Water Body Status:

Not Impaired

Receiving Water Body Impairments:

None

Final TMDLs for Receiving Water

None

8 Is the Project Located in the Watershed of a Waterbody with a TMDL?

Yes

[Click Here for Instructions](#)

9 List the TMDLs that Cover Waterbodies in the Projects Watershed:

Final TMDLs of Phosphorus

10 Is the Project Located in an Urban Area?

[Click Here for Instructions](#)

Requirements for BMPs Based on Receiving Water Body Status

The receiving waterbody is not impaired by a pollutant, BMPs should be implemented as required by MassDOT policy.

BMPs must be implemented to ensure that the discharge is consistent with any applicable WLA for the TMDL that covers the receiving water body. Contact the Environmental Section at MassDOT for guidance selecting the required BMPs to achieve this. Ensure that the BMPs selected are recorded in the 75% design stage checklist

The project is not located in a stressed basin, BMPs should be implemented as required by MassDOT policy.
