Re: Assabet River Rail Trail 25% Design  
Concord Water Division Comments

Dear Mr. Rezendes:

I am in receipt of 25% design submission for the Assabet River Rail Trail in Acton/Maynard. Please note that the Town of Concord Water & Sewer Division does not have any utilities in the path of the project as shown on the current plans.

With that said, the Water/Sewer Division remains particularly interested in future phase of work which is slated to involve the abandoned rail bed located immediately adjacent to a pumping station located on Great Road in Acton. This work will require the relay of an existing suction main and drainage discharge pipe (See attached map).

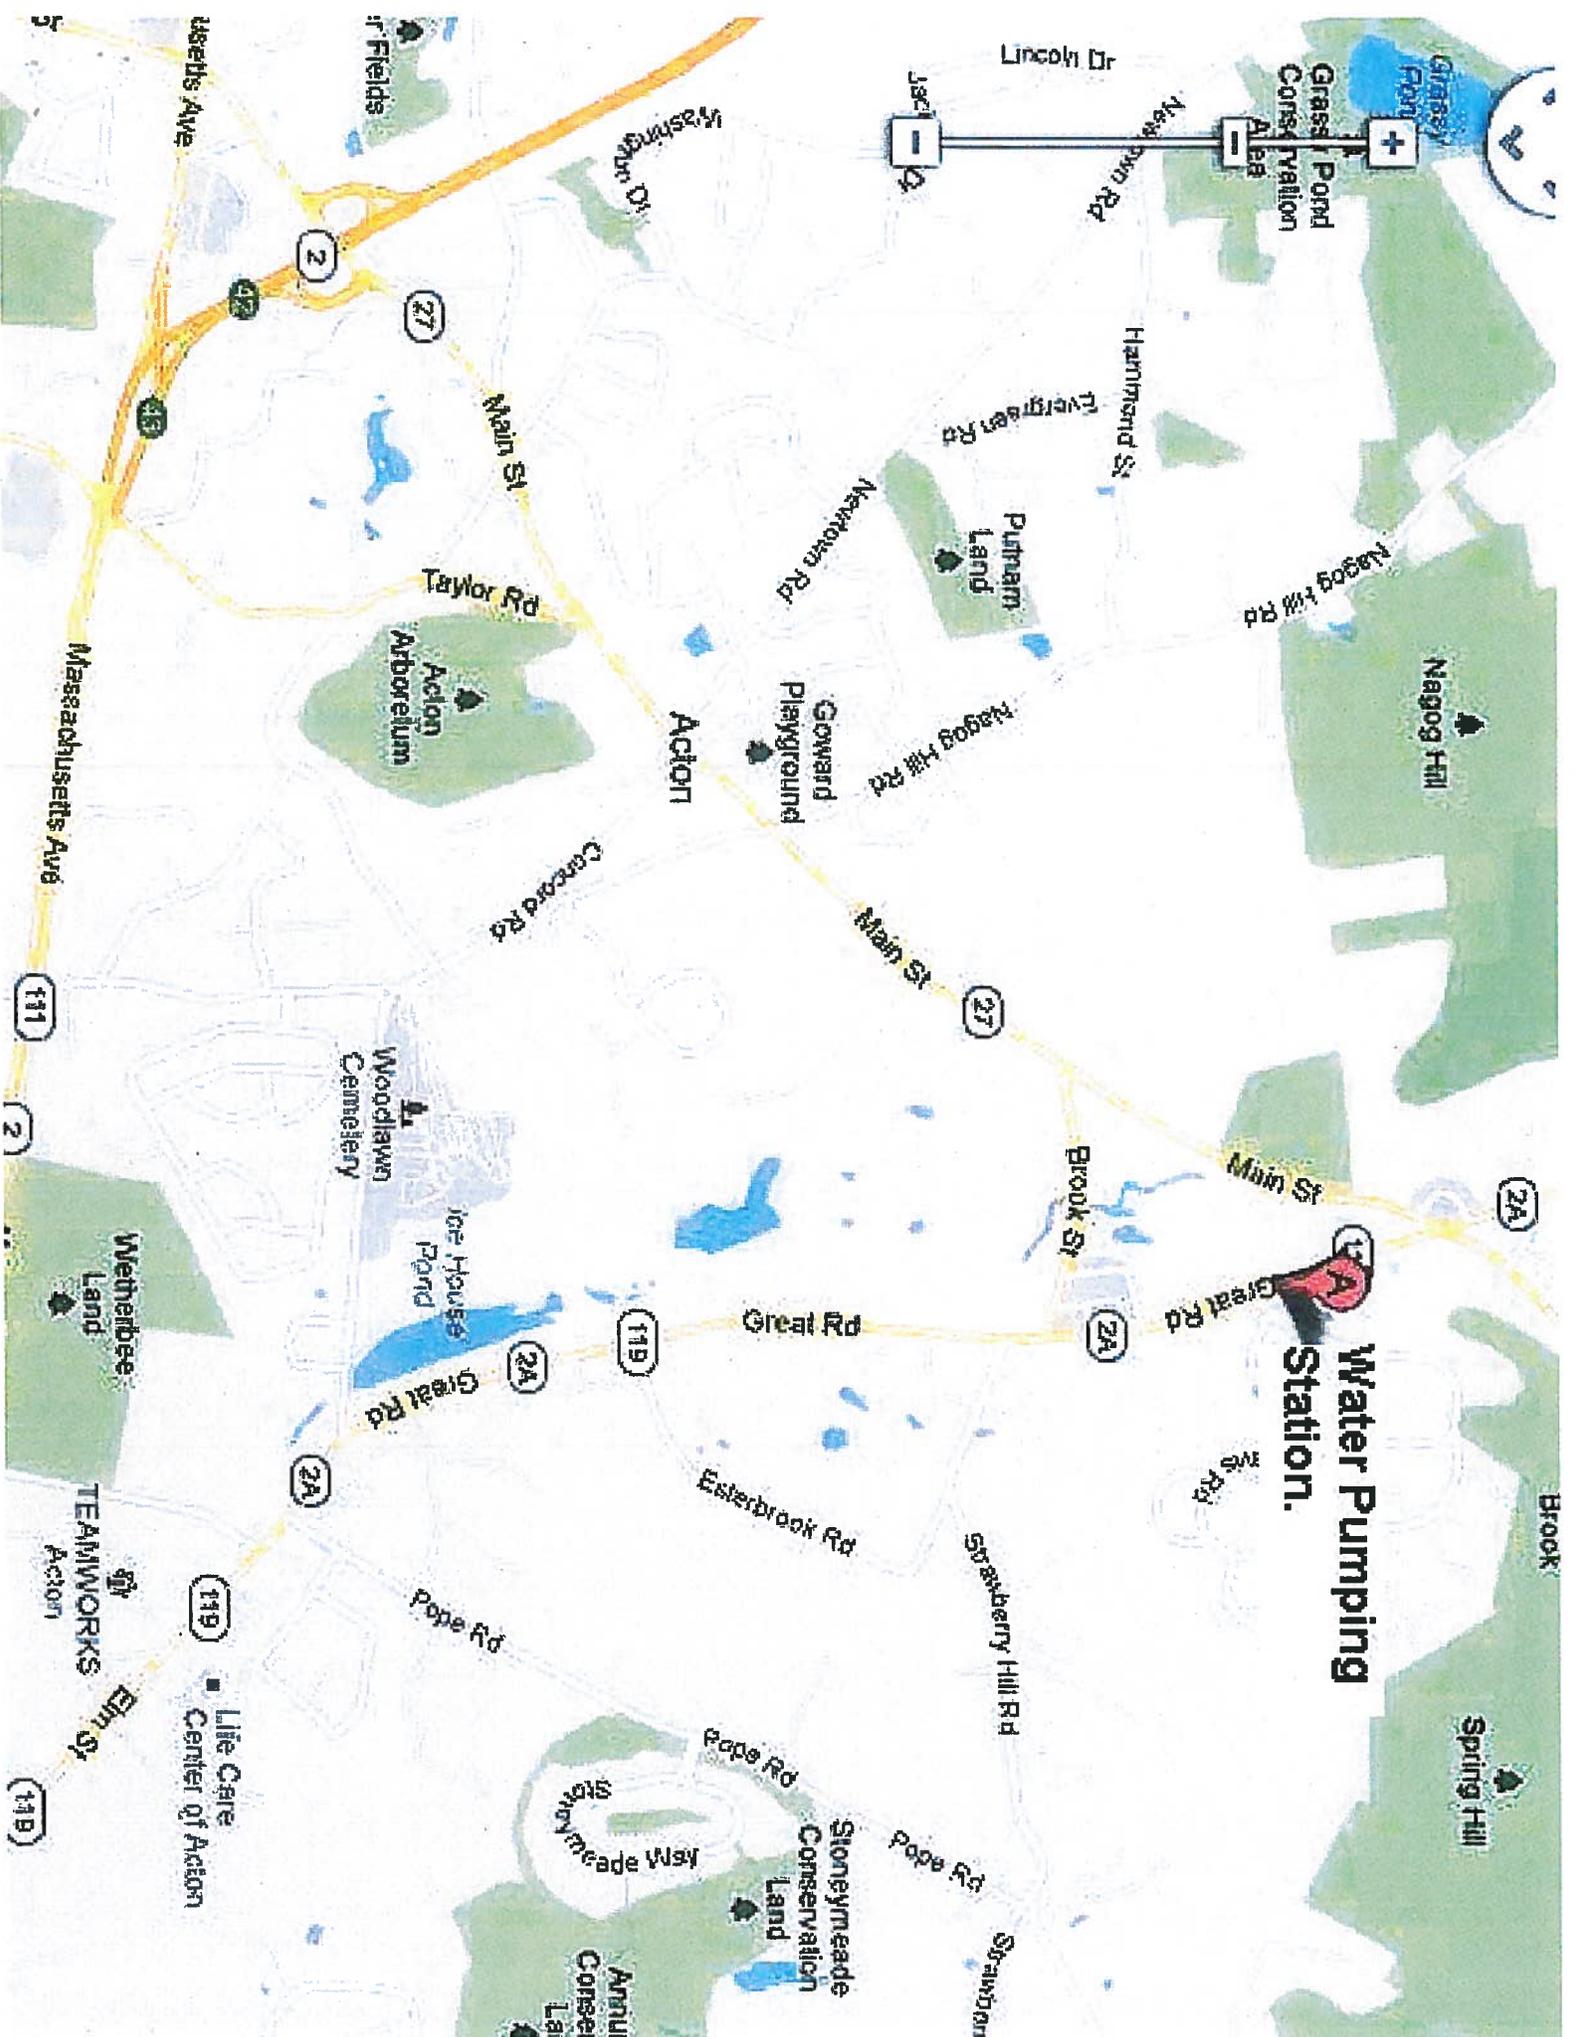

Unless there is any change/extension in the scope of the current project, the future submissions can proceed without seeking comments from the Water & Sewer Division. The Division appreciates inclusion of the Town in the early phase of Rail Trail projects and looks forward to working with Massachusetts Department of Transportation for any future projects affecting its utilities.

Sincerely,

Alan H. Cathcart  
Superintendent
