Michael,

I agree with this approach. I concur with the scheduling of a Design Public Hearing.

Hi Marie,

By tomorrow, I will be formally requesting approval for the 25% Design Public Hearing. I am giving you heads up because we have not performed a detailed 25% review of the resubmission and the utility coordination is pending.

I am personally in full support of scheduling the Public Hearing because it is the kind of the project that we need to get the public input earlier than later. It will be a lot more expensive for the town and will involve more design changes if we follow the standard SOP's.

The District and ROW already agreed to this scenario, and I am sure Environmental will concur.

Thanks.

Thank you

Arthur, I do not have an issue with she dulling the hearing but I want the district to concur.

Probably starting at 5 PM for set-up and then going to as late 10 PM – you know how difficult public meeting durations are to predict.

I will call Clock Tower Place tomorrow and secure a room for the hearing for June 13th. What time frame do you need?

Linda

Sorry – my bad. I meant to say June 13. I just checked my calendar.

Still, that is coming up almost as fast.

(Linda: Please check with Kevin about the date. It should be June 13, not June 7!!)

Hi, Mike –

Are we still on track for the June 7 hearing date? What do you think? The room is booked at Clock Town Place in Maynard – see below.

If it's a go, then advertising would have to crank up immediately, I would think.

Subject: meeting with DOT

I spoke with Kevin regarding a meeting with DOT. He suggested next Wednesday morning (May 15) or Tuesday morning (May 14). The property owner of the abandoned rail trail was also in my office this morning and is anxious to move forward on the easement.

Kevin did set up a 25% design meeting for June 7th at Clock Tower Place. I don't have the details, but Kevin will keep me in the loop. Let me know what you need for this meeting—configuration, number of chairs, food, projector, etc.

Thank you,
Linda
