

Street Cuts

BOSTON GAS COMPANY

WEST DISTRICT

70 PHILLIPS ST.

WATERTOWN 72, MASS.

Gentlemen:

We have received your notice of 8-12-63 concerning proposed excavation HOMER ST @ 25

Gas main and other facilities presently exist approximately as shown on attached plan, Gas service laterals which may not be shown specifically on said plan, connect with buildings on each side of the street.

Gas main and other facilities presently exist at the locations referred to. However, at this time it is not feasible to designate by plan our specific locations, but we shall be glad to designate them to your representative at the site or by consultation at our divisional office. Please be sure this has been done before proceeding.

Any information supplied or to be supplied is based upon a careful search of our records and is as accurate as can be determined, but is not guaranteed to be correct. For example, grade changes and terrain problems are often such that no assumptions should be made as to depth. Your attention is directed to the provisions of Chapter 316, Acts and Resolves of the General Court of Massachusetts of 1959, requiring that, "Any such excavation shall be performed in such manner and such reasonable precautions taken, as to avoid damage to the pipes or conduits in use under the surface of said way."

We stand ready to cooperate with you so that your work may be done safely and our facilities protected. Should you encounter any unusual conditions or have any questions about our facilities or locations, let us know promptly and we will be glad to consult with you further.

Very truly yours,

BOSTON GAS COMPANY

*We will have a man on the site 8-13-63
