Board of Selectmen
Town of Acton
Acton, Massachusetts

Gentlemen:

The American Telephone and Telegraph Company is in the process of converting its existing telephone facilities to an L-5 carrier system. In order to accomplish the conversion, the Telephone Company will bury precast manholes at specific locations within our existing easements. In conjunction with manhole construction, the Telephone Company requests permits to improve existing connecting driveways to a condition suitable for vehicular traffic as an access to our manholes for maintenance and emergency repair.

The location of the driveway is identified on the enclosed petition.

I would appreciate your giving favorable consideration to our need and advise the undersigned of the name and telephone number of your representative who will be responsible for inspection.

Very truly yours,

Richard A. Mlaker
Right-of-Way Supervisor
