

TOWN OF ACTON

Inter-Departmental Communication

DATE: December 14, 1973

FROM: Engineering Department

TO: Board of Selectmen

SUBJECT: Review of Petition of Boston Gas to Install Gas Main in Nagog Hill Road at Putnam Road

This is, for the most part, a routine request however we direct your attention to two problems:

1. A "Permit for Construction Within Public Ways" will be required as usually issued by this department.
2. Section II-A-5 of the Town's "Specifications for Regulating Construction within Public Ways" does not allow road surfaces to be cut between November 15 and March 15.

Since the proposed construction seems to be in anticipation of future house construction we will delay the issuing of our permit until next spring.

D. Abbott
