Acton Conservation Commission
Acton Town Hall
427 Main Street
Acton, MA 01720

Dear Acton Conservation Commission:

Goddard Consulting, LLC is pleased to submit this Notice of Intent (NOI) on behalf of the applicant, Steve Marsh of Westchester Homes, Inc, for the construction of a single-family home with associated utilities and grading within 100 feet of a Bordering Vegetated Wetland and an Isolated Vegetated Wetland on the parcels known as 121 and 123 Concord Rd and 4 Horseshoe Drive (G-4-49-6, G-4-49-4, and G-4-49-13). The resource areas on 121 Concord Rd and 4 Horseshoe Drive were delineated and approved in the previous ANRAD filing (DEP #CE-085-1128). 123 Concord Rd was delineated October 21st, 2013.

Existing Conditions

The three existing parcels are vacant with no previous construction. 4 Horseshoe Drive contains Isolated Vegetated Wetland non-jurisdictional under the WPA. 121 Concord Rd contains Isolated Vegetated Wetland non-jurisdictional under the WPA and a Bordering Vegetated Wetland with an intermittent stream jurisdictional under both the WPA and the Acton Wetlands Protection Bylaw. The intermittent stream continues onto 123 Concord Road. The parcels follow a gentle slope to the intermittent stream, which runs along Concord Road. Much of the proposed work is within the 100-foot Buffer Zone.

Proposed Conditions

All structures will be built outside the 75' No Build Setback and all grading will be outside the 50' No Disturb Setback under the Acton Wetlands Protection Bylaw. A portion of the proposed house will be within 100 feet of the Bordering Vegetated Wetland. The proposed house will be on the parcel 123 Concord Road, with grading on 121 Concord Rd and grading and the septic leaching area on 4 Horseshoe Drive. The proposed driveway will exit onto Horseshoe Drive.

Alternatives Analysis

Option 1: No work done. This alternative is practicable in protecting the resource areas, as no construction would leave the site as it currently exists, however, this is impracticable financially for the applicant.

Option 2: Move the house: This alternative is not possible, as the proposed house and septic system is as far from the resource areas as can be allowed while still complying with zoning bylaws. The house

is proposed in the only area outside the 100-foot Buffer Zone, and the leaching area is moved outside of both the BVW Buffer Zone and the IVW 75' Buffer Zone.

Option 3: Adjust the size of the house: This alternative would do little to move the house outside of the 100-foot Buffer Zone as only a small portion of the currently proposed house is outside the Buffer Zone. It would also be impracticable for the applicant as the proposed house is the same size or smaller than the surrounding houses.

These alternatives would have some positive impact on protecting the resource areas, however, they would impact the applicant negatively financially and economically. Overall, other than the No Work Alternative, none of the alternatives protect the site more than the proposed project do.

Construction Sequence

1. Installation of erosion controls
2. Excavation of septic system and leaching area
3. Installation of septic and leaching
4. Grading of site
5. Installation of foundation and driveway

Regulatory Compliance

The proposed construction will take place within 100 feet of the BVW and Intermittent Stream. Due to the shape and the size of the lots and the existing constraints due to the resource areas and the zoning bylaws, the project design is controlled in terms of size and location of the proposed house, driveway, and associated utilities and grading.

The Massachusetts Wetlands Protections Act is relevant as follows:

- 310 CMR 10.03(3) specifies that septic systems, so long as they are designed to comply with 310 CMR 15.00, are presumed to protect the eight interests identified in the WPA as long as they are not located with coastal resource areas or bordering vegetated wetlands. The proposed septic system has been located outside of all resources areas and complies with the WPA.
- All work proposed is at least 50 feet from the Bordering Vegetated Wetland, intermittent stream, or the Isolated Vegetated Wetland, and therefore protects the values of the WPA.

The Acton Wetlands Protection Bylaw and Regulations is relevant as follows:

- Section F8.3 of the Bylaw states the setbacks required under the Bylaw. The proposed project complies with the 50-foot buffer of undisturbed natural vegetation as well as the 75-foot setback of all structures. The proposed house and driveway are outside of the 75-foot setback.
- Section F8.4 requires sedimentation and erosion control to prevent transport of sediment into the wetlands. The project proposes a barrier of haybales at the edge of all proposed work. The proposed haybales will fall either at or outside of the 50-foot No Disturb Buffer Zone.

Four hard copies and 1 electronic copy of the NOI application are enclosed. The titles of all the documents enclosed are as follows:

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

B. Fees

Fee should be calculated using the following process & worksheet. **Please see Instructions before filling out worksheet.**

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

Enclosed please find a Notification to Abutters form to inform you of a public hearing that will be held by the Town of Acton Conservation Commission under the MA Wetland Protection Act and the Acton Wetlands Protection Bylaw. The subject of the hearing is for the proposed construction of a single-family home on a parcel known as 123 Concord Road (G-4-49-6) with associated grading and a leaching area on parcels 121 Concord Rd (G-4-49-4) and 4 Horseshoe Drive)G-4-49-13) located in Acton, MA.

Should you have any questions relative to this project, feel free to contact Goddard Consulting at 508-525-0726 or the Town of Acton Conservation Commission at (978) 929-6634.

If so, activity on your property may be subject to similar permitting requirements. Goddard Consulting is well experienced in the nuances of this town and is fully capable to assist you. If you are considering a project on your property, please contact us for all your wetland consulting and permitting needs.

Very truly yours,
