HOLD

NOTICE OF INSPECTION

TO: Renaissance Construction

SUBJECT: PERMIT TO CONSTRUCT WITHIN A PUBLIC WAY # 88-83
88-84

LOCATION: Ledge Rock Way

DATE: Sept. 7, 1990

THE FOLLOWING WORK REMAINS TO BE DONE:

Permit # 88-83 : The final course of pavement must be installed on the driveways and parking lots prior to the release of the performance bond. We are especially concerned with the condition of the joints where the driveways meet the pavement at Ledge Rock Way. These joints must be saw-cut or jack-hammered prior to installing the final course of pavement. The joints should then be sealed and sanded.

Permit # 88-84 : The ends of the drainage pipes in the catch basin in Ledge Rock Way must be mortared inside the structure to prevent erosion of material into the catch basin, and deterioration of the structure. The catch basin should also be cleaned of sand and silt from the pipe inverts all the way to the hard bottoms of the structure.

If you have any questions, or need additional information, please feel free to contact me at 264-9628.

Dennis P. Ring
Engineering Assistant
