RE: PCRC Special Permit 13-01

Dear Members of Board,

March 9, 2015

As we have approached the end of the Conservation Commission portion of the permitting process for the above-mentioned project, I have been informed that the special-permit issued by the Planning Department has expired.

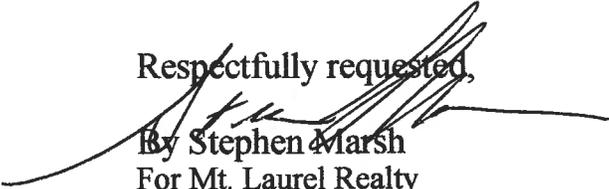

I was under the impression that the special-permit was issued contingent on the approval of the Conservation Commission; more specifically a required condition to be implemented prior to the actual issuance.

If this is in fact true, I respectfully request that the Planning Board consider this an extension of the special-permit request; as is required for a normal extension request.

I am requesting this under a hardship, as refilling will delay the project even further as the permitting process has taken over two years.

Please let me know when the next available meeting is to be held.

Respectfully requested,
