

GREEN MUNICIPAL AGGREGATION

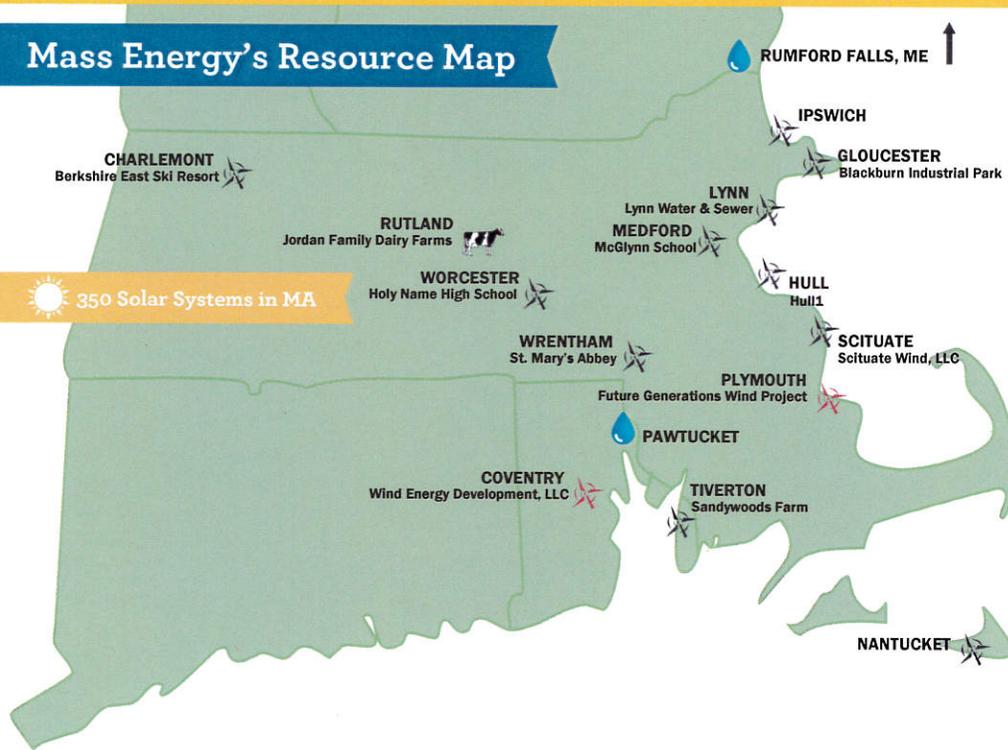

Using municipal aggregation to increase renewable energy content

We are a nonprofit dedicated to making energy more affordable and environmentally sustainable. With our green power program, you can make the switch to 100% Class I renewable energy in your home or business.

Mass Energy's Resource Map

Mass Energy supplies Renewable Portfolio Standard (RPS) Class I qualified RECs to our customers.

This ensures our voluntary green power purchases have the biggest impact shifting the New England power grid away from fossil fuels.

By supplying +5% Class I RECs to a CCA's default supply product, we are pushing the city 5 years ahead of MA state law!
