Dear Mr. Tidman,

Dewberry-Goodkind, Inc. (Dewberry), observed the construction process of the 175 feet tall monopole and associated fenced in compound at the referenced location during various stages of construction. Field reports summarizing the dates, site conditions and observations throughout construction were submitted to ATC Construction Services.

The general contractor informed Dewberry that a representative of the Acton Conservation Commission inspected and approved the erosion control installation prior to the start of construction. During subsequent site construction inspections, the erosion control was observed to be installed and maintained in good condition/repair.

Should you have any additional questions or comments, please do not hesitate to contact our office.

Sincerely,
Dewberry
