Kristen

We have checked the decision. The decision required the applicant to have a professional engineer determine the need for a stop sign and line at Pope Road. There was no additional review of the sight distance/tree removal issue required by the decision. As such I would recommend the initial consultant's findings be followed and the trees removed.

Bruce

Good morning,

Roland said he forwarded the email below to you. Did you ever respond to it? If so, what did you say? If not, if/when you respond, can you let me know what you say? I just want to be prepared for the Planning Board meeting 8/23.

Thanks.

Kristin

Trees have been reposted, I have asked Andrea to get the ad to the Beacon. Has a real traffic engineer evaluated the need to cut back the slope? The two largest trees flanking the driveway into #44 Pope are really magnificent. In fact, the largest Oak could qualify for "Heritage Tree" status under some state guidelines.
