Subject: One last thought

Hello Friends-

I just wanted to toss in one more pitch for John.

Simply put:

- The Town is in great shape
- John Murray has been integral to its success
- I have seen him "up close and personal" do his work, day after day, year after year and his work is superb.
- I could not ask anything more of someone in his position.
- And, I don't think we need to throw out the people who helped with the gains of the last 20 years.

Bottom line

In all areas including finance, open space, affordable housing, recreation, public safety, environmental control, preparedness and planning, we are better off now than when John started. It is like the old line in politics, "are you better off today than you were 4 years ago?". Now, the line is "is the Town of Acton better off than it was 15 years ago?" The answer is a resounding "yes"! That type of fact-based success deserves the reward of appointing the person who played the most important role, other than his predecessor.

For Acton,
For the future,
For the environment,
For affordable housing,
For solid financial management,
For strong raw intellect
For a new management approach

Please vote for John Murray.

And with that, I bid you good luck

Bill
