C. Other Applicable Standards and Requirements

Streamlined Massachusetts Endangered Species Act/Wetlands Protection Act Review

1. Is any portion of the proposed project located in **Estimated Habitat of Rare Wildlife** as indicated on the most recent Estimated Habitat Map of State-Listed Rare Wetland Wildlife published by the Natural Heritage and Endangered Species Program (NHESP)? To view habitat maps, see the *Massachusetts Natural Heritage Atlas* or go to <http://www.mass.gov/dfwele/dfw/nhesp/nhregmap.htm>.

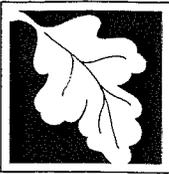

a. Yes No **If yes, include proof of mailing or hand delivery of NOI to:**

**Natural Heritage and Endangered Species Program
Division of Fisheries and Wildlife
Route 135, North Drive
Westborough, MA 01581**

2006

b. Date of map

If yes, the project is also subject to Massachusetts Endangered Species Act (MESA) review (321 CMR 10.18). To qualify for a streamlined, 30-day, MESA/Wetlands Protection Act review, please complete Section C.1.C, and include requested materials with this Notice of Intent (NOI); OR complete Section C.1.d, if applicable. *If MESA supplemental information is not included with the NOI, by completing Section 1 of this form, the NHESP will require a separate MESA filing which may take up to 90 days to review (unless noted exceptions in Section 2 apply, see below).*

WPA Form 3 – Notice of Intent

Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

Provided by MassDEP:

MassDEP File Number _____

Document Transaction Number _____

Acton _____

City/Town _____

C. Other Applicable Standards and Requirements (cont'd)

1. c. Submit Supplemental Information for Endangered Species Review *

1. Percentage/acreage of property to be altered:

(a) within wetland Resource Area

_____ percentage/acreage

(b) outside Resource Area

_____ percentage/acreage

2. Assessor's Map or right-of-way plan of site

3. Project plans for entire project site, including wetland resource areas and areas outside of wetlands jurisdiction, showing existing and proposed conditions, existing and proposed tree/vegetation clearing line, and clearly demarcated limits of work **

(a) Project description (including description of impacts outside of wetland resource area & buffer zone)

(b) Photographs representative of the site

(c) MESA filing fee (fee information available at:
<http://www.mass.gov/dfwele/dfw/nhesp/nhenvmesa.htm>)

Make check payable to "Natural Heritage & Endangered Species Fund" and **mail to NHESP** at above address

Projects altering 10 or more acres of land, also submit:

(d) Vegetation cover type map of site

(e) Project plans showing Priority & Estimated Habitat boundaries

d. OR Check One of the Following

1. Project is exempt from MESA review.

Attach applicant letter indicating which MESA exemption applies. (See 321 CMR 10.14, <http://www.mass.gov/dfwele/dfw/nhesp/nhenvexemptions.htm>; the NOI must still be sent to NHESP if the project is within estimated habitat pursuant to 310 CMR 10.37 and 10.59.)

2. Separate MESA review ongoing.

_____ a. NHESP Tracking Number

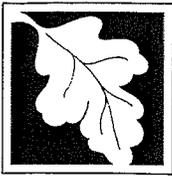

_____ b. Date submitted to NHESP

3. Separate MESA review completed.

Include copy of NHESP "no Take" determination or valid Conservation & Management Permit with approved plan.

* Some projects **not** in Estimated Habitat may be located in Priority Habitat, and require NHESP review (see www.nhosp.org regulatory review tab). Priority Habitat includes habitat for state-listed plants and strictly upland species not protected by the Wetlands Protection Act.

** MESA projects may not be segmented (321 CMR 10.16). The applicant must disclose full development plans even if such plans are not required as part of the Notice of Intent process.

C. Other Applicable Standards and Requirements (cont'd)

2. For coastal projects only, is any portion of the proposed project located below the mean high water line or in a fish run?
- a. Not applicable – project is in inland resource area only

- b. Yes No

If yes, include proof of mailing or hand delivery of NOI to either:

South Shore - Cohasset to Rhode Island, and the Cape & Islands:

North Shore - Hull to New Hampshire:

Division of Marine Fisheries -
Southeast Marine Fisheries Station
Attn: Environmental Reviewer
838 South Rodney French Blvd.
New Bedford, MA 02744

Division of Marine Fisheries -
North Shore Office
Attn: Environmental Reviewer
30 Emerson Avenue
Gloucester, MA 01930

Also if yes, the project may require a Chapter 91 license. For coastal towns in the Northeast Region, please contact MassDEP's Boston Office. For coastal towns in the Southeast Region, please contact MassDEP's Southeast Regional Office.

3. Is any portion of the proposed project within an Area of Critical Environmental Concern (ACEC)?

- a. Yes No

If yes, provide name of ACEC (see instructions to WPA Form 3 or MassDEP Website for ACEC locations). **Note:** electronic filers click on Website.

b. ACEC _____

4. Is any portion of the proposed project within an area designated as an Outstanding Resource Water (ORW) as designated in the Massachusetts Surface Water Quality Standards, 314 CMR 4.00?

- a. Yes No

5. Is any portion of the site subject to a Wetlands Restriction Order under the Inland Wetlands Restriction Act (M.G.L. c. 131, § 40A) or the Coastal Wetlands Restriction Act (M.G.L. c. 130, § 105)?

- a. Yes No

6. Is this project subject to provisions of the MassDEP Stormwater Management Standards?

- a. Yes. Attach a copy of the Stormwater Report as required by the Stormwater Management Standards per 310 CMR 10.05(6)(k)-(q) and check if:

1. Applying for Low Impact Development (LID) site design credits (as described in Stormwater Management Handbook Vol. 2, Chapter 3)
2. A portion of the site constitutes redevelopment
3. Proprietary BMPs are included in the Stormwater Management System.

- b. No. Check why the project is exempt:

1. Single-family house
2. Emergency road repair
3. Small Residential Subdivision (less than or equal to 4 single-family houses or less than or equal to 4 units in multi-family housing project) with no discharge to Critical Areas.

Online Users:

D. Additional Information

Applicants must include the following with this Notice of Intent (NOI). See instructions for details.

Online Users: Attach the document transaction number (provided on your receipt page) for any of the following information you submit to the Department.

1. USGS or other map of the area (along with a narrative description, if necessary) containing sufficient information for the Conservation Commission and the Department to locate the site. (Electronic filers may omit this item.)
2. Plans identifying the location of proposed activities (including activities proposed to serve as a Bordering Vegetated Wetland [BWV] replication area or other mitigating measure) relative to the boundaries of each affected resource area.
3. Identify the method for BWV and other resource area boundary delineations (MassDEP BWV Field Data Form(s), Determination of Applicability, Order of Resource Area Delineation, etc.), and attach documentation of the methodology.
4. List the titles and dates for all plans and other materials submitted with this NOI.

See Attached.

a. Plan Title

b. Prepared By

c. Signed and Stamped by

d. Final Revision Date

e. Scale

f. Additional Plan or Document Title

g. Date

5. If there is more than one property owner, please attach a list of these property owners not listed on this form.
6. Attach proof of mailing for Natural Heritage and Endangered Species Program, if needed.
7. Attach proof of mailing for Massachusetts Division of Marine Fisheries, if needed.
8. Attach NOI Wetland Fee Transmittal Form
9. Attach Stormwater Report, if needed.

E. Fees

1. Fee Exempt: No filing fee shall be assessed for projects of any city, town, county, or district of the Commonwealth, federally recognized Indian tribe housing authority, municipal housing authority, or the Massachusetts Bay Transportation Authority.

Applicants must submit the following information (in addition to pages 1 and 2 of the NOI Wetland Fee Transmittal Form) to confirm fee payment:

1121

2. Municipal Check Number

4/29/2008

3. Check date

1120

4. State Check Number

4/29/2008

5. Check date

F. Signatures and Submittal Requirements

I hereby certify under the penalties of perjury that the foregoing Notice of Intent and accompanying plans, documents, and supporting data are true and complete to the best of my knowledge. I understand that the Conservation Commission will place notification of this Notice in a local newspaper at the expense of the applicant in accordance with the wetlands regulations, 310 CMR 10.05(5)(a).

I further certify under penalties of perjury that all abutters were notified of this application, pursuant to the requirements of M.G.L. c. 131, § 40. Notice must be made by Certificate of Mailing or in writing by hand delivery or certified mail (return receipt requested) to all abutters within 100 feet of the property line of the project location.

	<i>as agent GPR INC.</i>	<i>5/1/8</i>
1. Signature of Applicant		2. Date
3. Signature of Property Owner (if different)	<i>GPR, INC</i>	4. Date
5. Signature of Representative (if any)		6. Date <i>5/1/8</i>

For Conservation Commission:

Two copies of the completed Notice of Intent (Form 3), including supporting plans and documents, two copies of the NOI Wetland Fee Transmittal Form, and the city/town fee payment, to the Conservation Commission by certified mail or hand delivery.

For MassDEP:

One copy of the completed Notice of Intent (Form 3), including supporting plans and documents, one copy of the NOI Wetland Fee Transmittal Form, and a **copy** of the state fee payment to the MassDEP Regional Office (see Instructions) by certified mail or hand delivery.

Other:

If the applicant has checked the "yes" box in any part of Section C, Item 3, above, refer to that section and the instructions for additional submittal requirements.

The original and copies must be sent simultaneously. Failure by the applicant to send copies in a timely manner may result in dismissal of the Notice of Intent.

NARRATIVE
to accompany
NOTICE OF INTENT

Lots 2A through 2F, 81 River Street, Acton, MA

GENERAL

The purpose of this project is to redevelop a currently degraded industrial site into a residential community while improving environmental protection through the employment of stormwater Best Management Practices (BMP's) and Low Impact Development (LID) applications. This narrative describes the scope of the project as a whole and the "Impervious Area Summary" on page 4 denotes individual lot characteristics.

The total subject site (Lots 2A through 2F) contains 126,150± SF (2.90± Ac) on the southwest of River Street, between the street and Fort Pond Brook. The site is bordered to the south by Fort Pond Brook and to the west by bordering vegetated wetlands adjacent to the brook. The site ranges in elevation from 169 feet at the northern property line to 155 feet at the bank of Fort Pond Brook. Existing on site is a 12,000± SF abandoned mill building that has portions located at the bank of Fort Pond Brook, with a concrete post supporting a portion of the structure located in the brook. There are also a series of retaining walls at the bank of the brook in this area. The surrounding site consists of various debris, material stockpiles, and densely compacted gravel parking areas that have been traversed for many years. Small areas within the gravel parking have grown in with invasive underbrush, but the underlying material is basically impervious. Soils with the subject site are predominantly classified as Scituate Fine Sandy Loam (317B) of hydraulic soil group "C" with lesser amounts of Charlton Hollis Outcrop (103D) adjacent to the river.

Work under this notice consists of razing a large portion of the existing building, removing all debris, stockpiles and parking areas, and restoring the surrounding degraded riverfront area. Development will include the renovation of the remaining third of the building to accommodate a four unit, multifamily dwelling. Also proposed on site are five single family dwellings. Three new driveways will be constructed to serve the five single family dwellings. A fourth driveway and associated carport will be constructed to serve the multifamily dwelling. Other construction includes utilities work, sidewalks, landscaping, and a stormwater management system. The stormwater management system will be comprised of a combination of Low Impact Development applications including, reduced impervious areas (shared driveways), grassed drainage channels, vegetated filter strips and bioretention cells. All proposed disturbance will occur within the already degraded riverfront area / wetland buffer zone. The stability of retaining walls located at the bank of Fort Pond Brook will also be addressed during the dry season, typically July-August.

JURISDICTION

The primary resource area is Fort Pond Brook, which is a perennial stream that flows west to east through the southern and eastern portions of the site. Attendant to this resource are Bordering Vegetated Wetland (BVW), Floodplain, and Riverfront Area, all of which project onto the site.

Bordering Vegetated Wetland (310 CMR 10.55)

This resource is limited to the west/northwest of the property, on an undisturbed portion of the site; BVW also extends along the bank of Fort Pond Brook. No wetland will be disturbed during development. On average, the limit of disturbance will be located over 50 feet away from this resource area and will remain within previously disturbed areas. The northernmost single family dwelling, on Lot 2A, will be located 35± feet away from the BVW within the existing gravel parking area/stockpile area. Portions of the multifamily dwelling and the existing retaining walls will remain at the edge of Fort Pond Brook. There will be no newly disturbed area within the buffer zone. An integral silt fence barrier will define the limit of work.

Bordering Land Subject to Flooding (310 CMR 10.57)

The 100-year floodplain on site is defined by FEMA via study FIRM maps and flood profiles and coordinated with on the ground survey. The 100-year flood elevation associated with Fort Pond Brook drops from an elevation of 161.0 feet at the northwest end of the site, to an elevation of 156.1 feet where the brook crosses under River Street. These grades were interpolated from cross-sections available from F.I.S. data.

The existing structure is located outside the 100-year floodplain, as the floodplain is controlled at points by retaining walls along the side of the structure leading to the crossing under River Street. Proposed construction near the floodplain will consist of the renovation of the existing mill building, and assessment of the existing retaining wall which will continue to control the floodplain. Minor disturbance within the floodplain is proposed for the stormwater management system. Approximately 133 cubic feet of floodplain will be filled at an elevation of 158.0 and 1,348± cubic feet of compensatory storage have been provided at the same elevation.

Riverfront Area Redevelopment (310 CMR 10.58 (5))

The total site area is 126,150± SF, all of which is located within the 200' Riverfront Area. Of the riverfront area, 68,000± SF is 'degraded riverfront'. The 'degraded riverfront' consists of the existing mill building and associated gravel parking/access as well as debris and material stockpiles and very little vegetation.

The proposed redevelopment consists of 27,280± SF of impervious area including dwellings, access driveways and a carport, all within the previously disturbed, degraded riverfront. The remaining area (40,720± SF) within the degraded riverfront will be improved by removing all debris, retaining mature vegetation, grading to a topography which reduces runoff and increases infiltration and removing densely packed soil and replacing it with topsoil, grass yards and landscape areas. Stormwater management is provided according to the standards established by the Department using grassed drainage channels, vegetated filter strips and bioretention cells. The bioretention cells will be planted with a native New England Meadow Mix along with supplemental native plantings as specified by Oxbow Associates with the goal of establishing a native riverfront wildlife community. Other than the bioretention cell outlets, the

proposed work does not exceed the amount of degraded area on site and is not located closer to the river than existing conditions. Existing vegetation outside of the previous degraded riverfront will be preserved.

RIVERFRONT AREA ALTERNATIVES ANALYSIS

Pre-conditions: See above.

Project Purpose: Redevelop degraded industrial property and install stormwater BMP where none currently exist.

Alternatives:

There are no practicable and substantially equivalent alternatives as defined in 310 CMR 10.58(4)(c)1 within the scope of alternatives as set forth in 310 CMR 10.58(4)(c)2 with less adverse effects on the interests identified in M.G.L. c. 131 subsection 40. Since the area is currently degraded, work within this area is vital to the improvement of environmental protection.

In order to improve water quality in the brook and adjacent wetlands, stormwater BMP's must be installed. This work, together with the required environmental studies / remediation, demolition / reconstruction of the mill building, and site improvements must be funded by a viable building formula.

The proponent has determined that the proposed development is the minimum that will make this project successful from a financial standpoint, given the costs associated with the remediation / improvements described above.

STORMWATER MANAGEMENT

Post-development runoff rates and volumes have been reduced for the 2, 10 and 100 year storms, as shown in the Stormwater Management Calculations. The majority of stormwater will continue to discharge into Fort Pond Brook; however, a series of BMP's will be utilized to improve the water quality of the runoff.

Runoff from impervious surfaces contribute to the primary treatment process which is comprised of sloped pavement areas and grassed drainage channels that direct runoff overland to stone diaphragms and vegetated filter strips. The vegetated filter strips allow infiltration and treat the runoff while directing stormwater to bioretention cells. Bioretention cells further treat and exfiltrate runoff prior to discharging treated stormwater to Fort Pond Brook. The proposed stormwater design addresses Total Suspended Solids (TSS) removal, groundwater recharge, and prevents appreciable sediment transport by trapping sediment on site. The design will also provide adequate drainage for new surfaces while providing a cost-effective engineering solution that addresses regulatory as well as real-world constraints.

Impervious Area Summary							
	Lot 2A	Lot 2B	Lot 2C	Lot 2D	Lot 2E	Lot 2F	Total
Proposed Lot Area	42,889 SF	12,262 SF	12,302 SF	14,070 SF	15,385 SF	29,241 SF	126,149 SF
Impervious Area							
Existing Buildings							12,000 SF
Proposed Buildings	1,824 SF	2,112 SF	1,764 SF	2,016 SF	1,912 SF	7,643 SF	17,271 SF
Existing Other Impervious [1]							56,000 SF
Proposed Other Impervious [1]	1,136 SF	1,132 SF	1,132 SF	1,136 SF	1,628 SF	6,416 SF	12,580 SF
Net Impervious Reduction							38,149 SF

Notes:

[1] Existing and proposed other impervious areas include all impervious areas on-site other than buildings.

CONCLUSION

The project, when completed in conjunction with the proper use of erosion and sediment controls, and construction sequences as outlined on the attached documents, will be a substantial improvement in terms of environmental protection over what currently exists (310 CMR 10.58 (5) (a)).

Lot 2, 81 River Street, Acton, MA

CONSTRUCTION SEQUENCE

In an effort to protect environmentally sensitive areas on site, the following procedure will serve as a guide to the Contractor in completing site work:

Before any grading activities begin:

1. Walk site and identify locations of limit of work and environmentally sensitive areas. Established a construction staging area located beyond environmentally sensitive areas.
2. Define limits of clearing associated with construction.
3. Install control measures as shown on the approved plan including, but not limited to, the construction entrance, and silt fence barrier as the limit of work.

Site Grading and Demolition:

1. Begin demolition of portions of the existing mill building.
2. Begin clearing and grubbing operations.
3. Begin site grading and topsoil stripping.
4. Establish topsoil stockpiles.
5. Install hay bales around stockpiles and temporarily stabilize the stockpiles with erosion controls.
6. Disturbed areas where construction will cease for more than 14 days will be stabilized with erosion controls.

Infrastructure (driveway/parking prep, utilities, etc.):

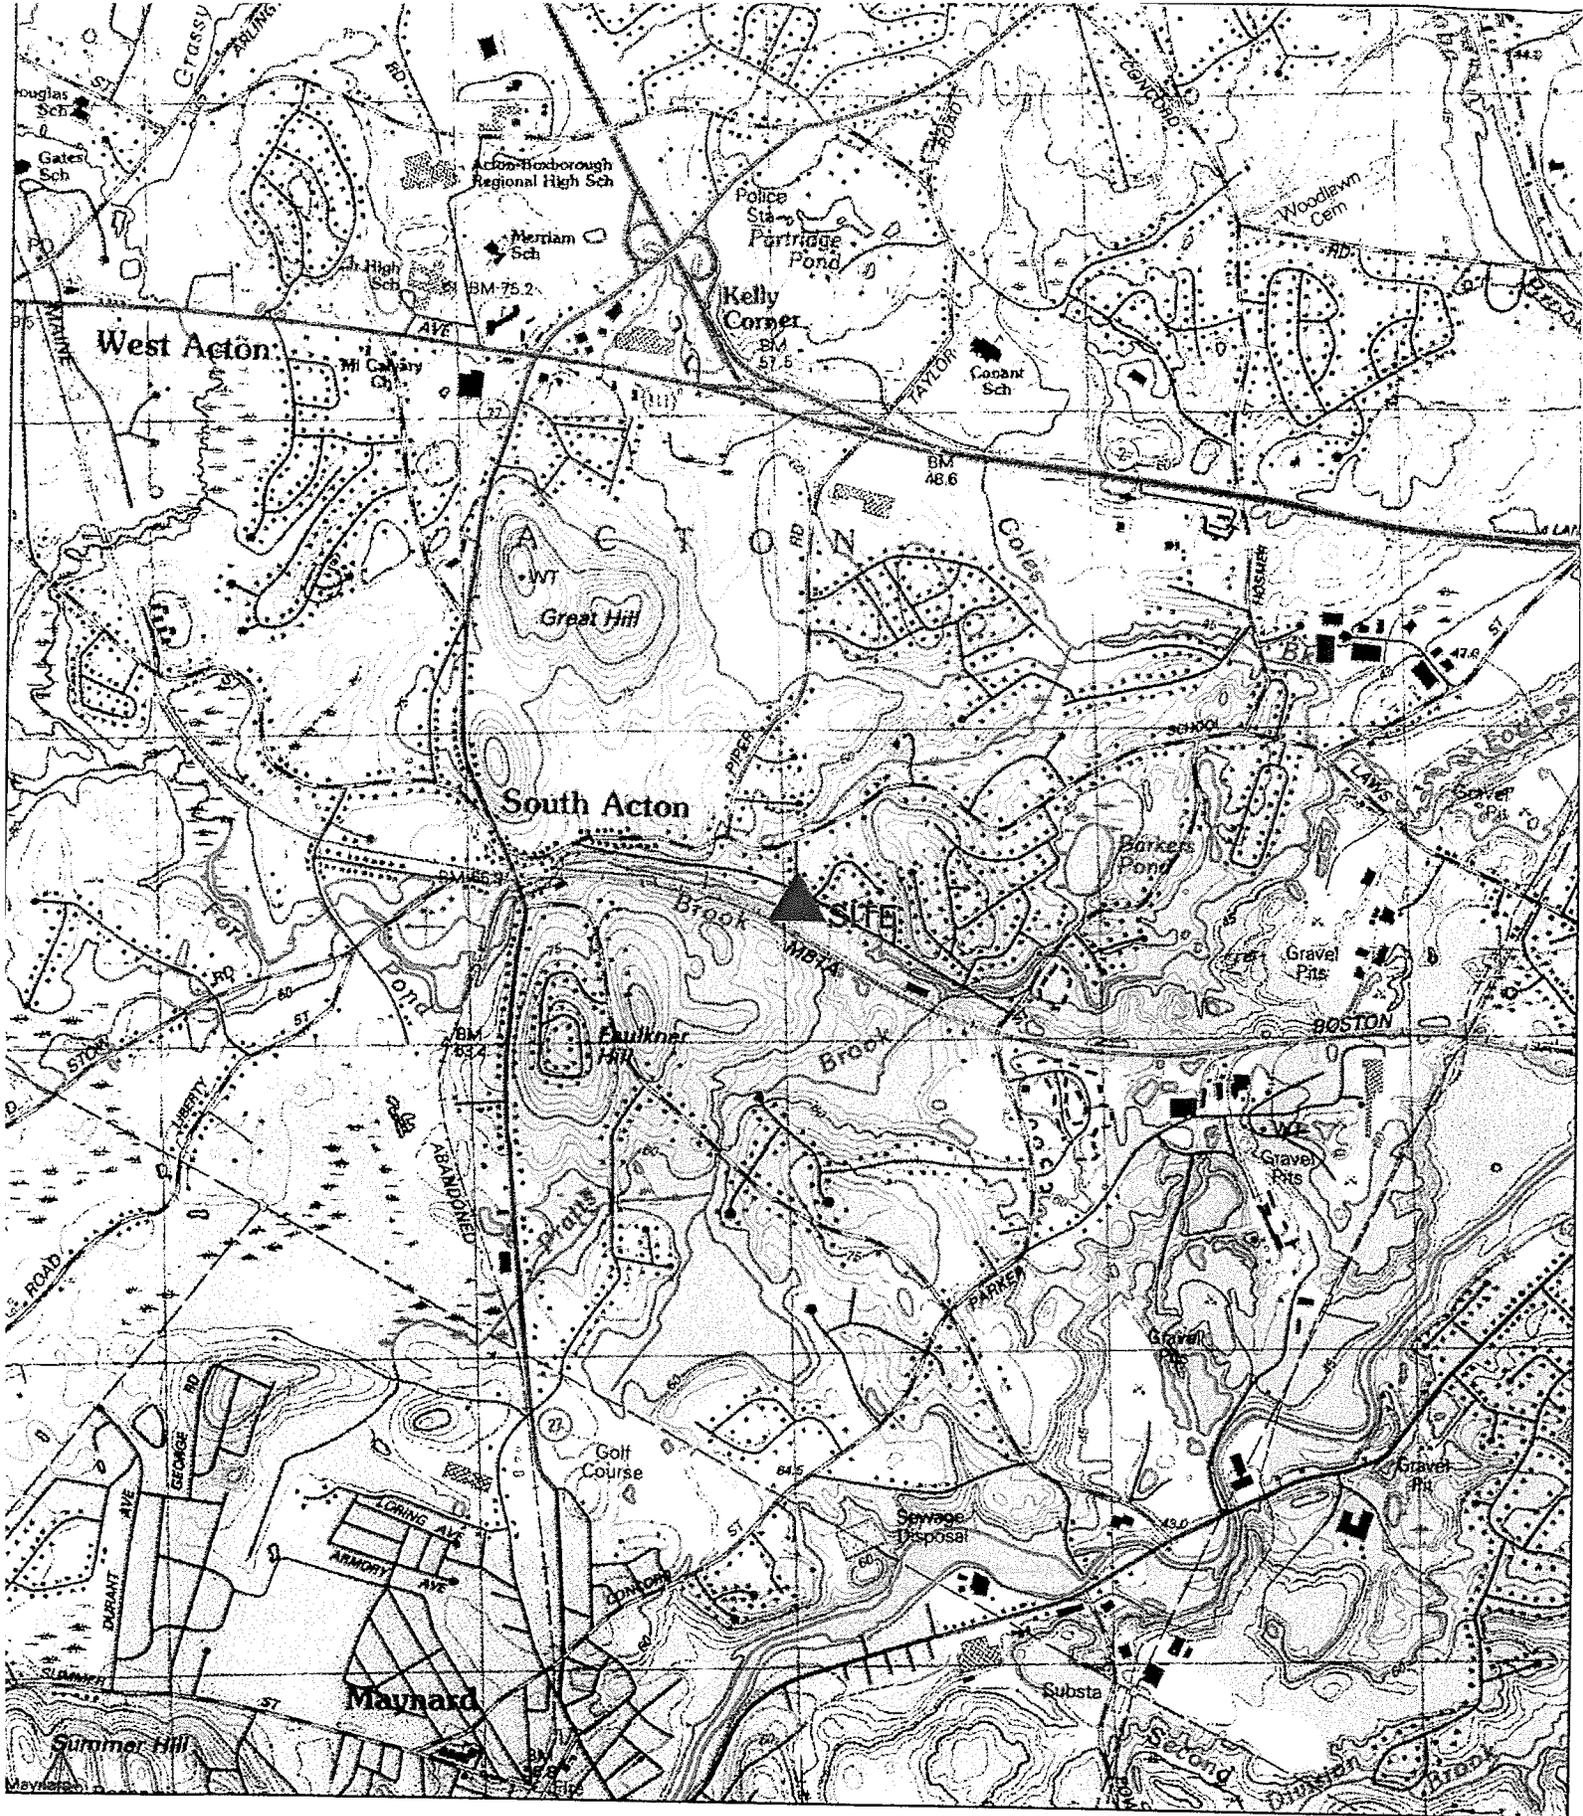

1. Construct combined staging and materials storage area.
2. Construct both bioretention areas.
3. Begin installation of stormwater collection system (catch basins, manholes, swales, etc.).
4. Begin installation of underground utilities (electric, gas and communications).

Dwelling construction:

1. Construct temporary concrete washout areas.
2. Install dwelling foundations.
3. Complete service connections to utilities within the road layout.
4. Prepared driveway pavement subgrade and base materials.
5. Install bituminous concrete driveway
6. Disturbed area where construction will cease for more than 14 days will be stabilized with erosion controls.

Final stabilization:

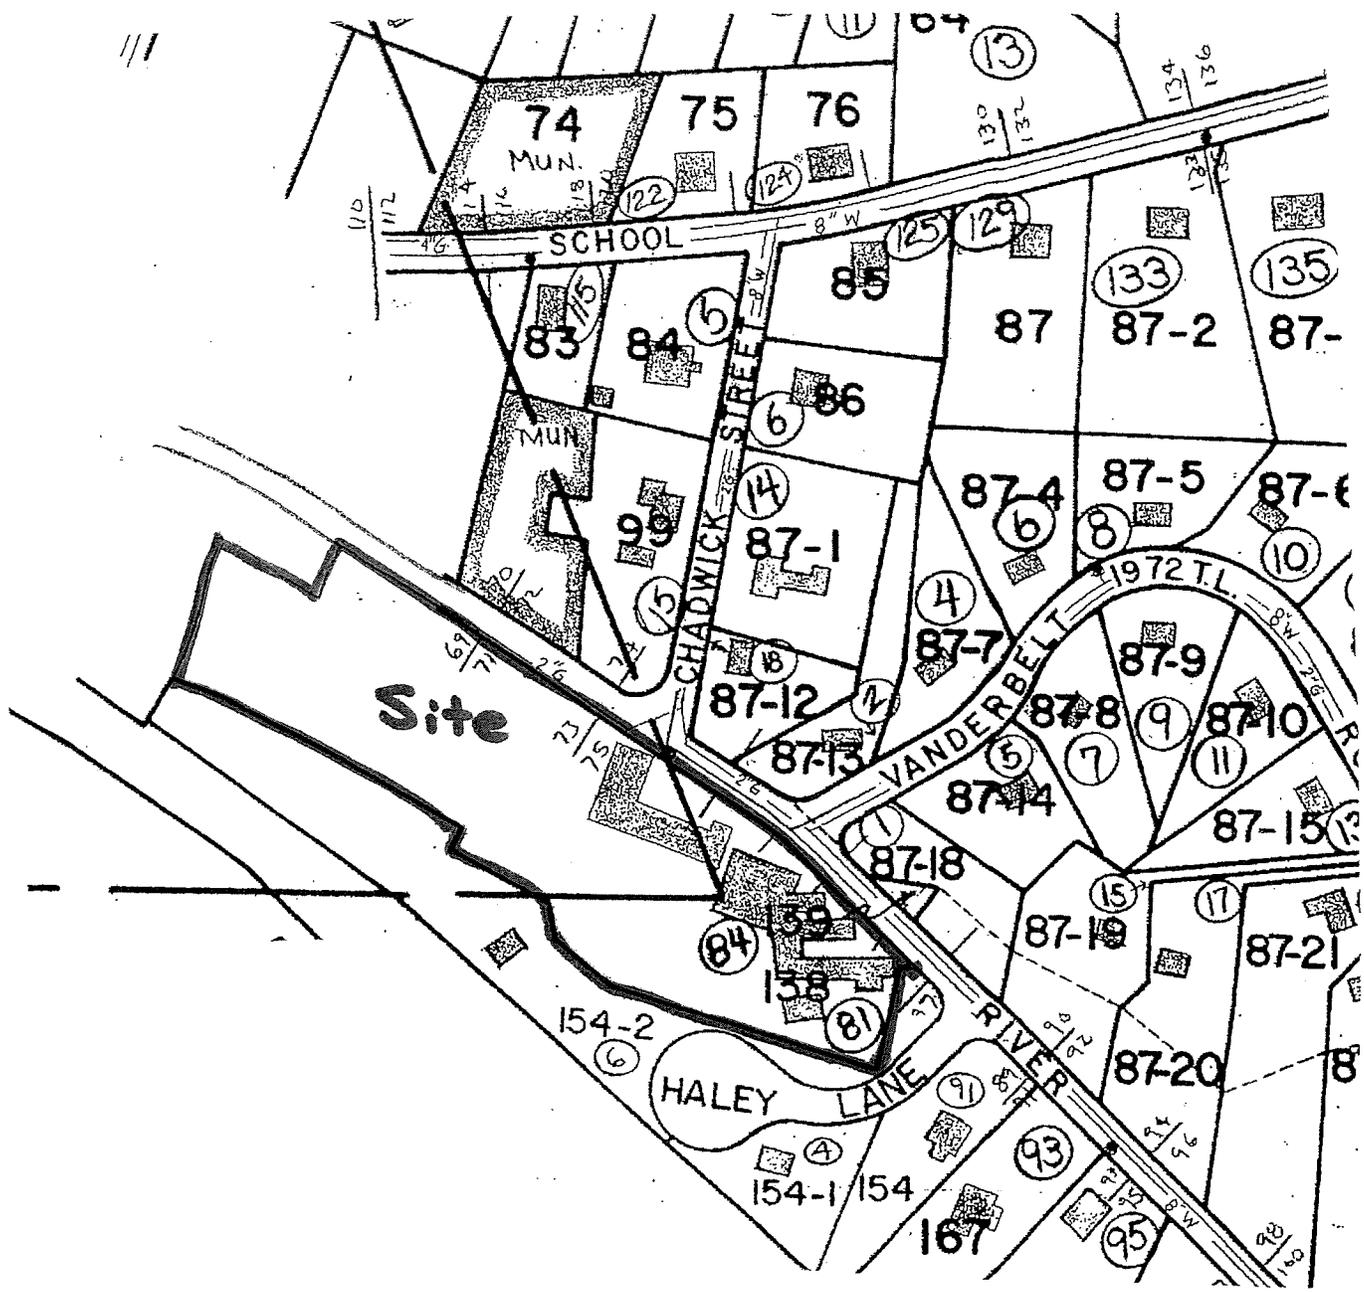

1. Complete final grading.
2. Remove any BMP's from catch basin inlets and finalize pavement activities.
3. Remove temporary concrete washout areas and restore areas to finish grade.
4. Remove all temporary control BMP's and stabilize any area disturbed by the removal of erosion controls.
5. Prepare site for final seeding and landscaping.
6. Monitor stabilized areas until final stabilization is achieved.
7. Install finish course of bituminous concrete pavement.

 h. Phone Number _____ i. Fax Number _____ j. Email Address _____

2. Property Owner (if different):

a. First Name _____ b. Last Name _____

 c. Organization _____

 d. Mailing Address _____

 e. City/Town _____ f. State _____ g. Zip Code _____

 h. Phone Number _____ i. Fax Number _____ j. Email Address _____

3. Project Location:

Lot 2A, 81 River Street _____ Acton _____
 a. Street Address _____ b. City/Town _____

B. Fees

The fee should be calculated using the following six-step process and worksheet. **Please see Instructions before filling out worksheet.**

Step 1/Type of Activity: Describe each type of activity that will occur in wetland resource area and buffer zone.

Step 2/Number of Activities: Identify the number of each type of activity.

Step 3/Individual Activity Fee: Identify each activity fee from the six project categories listed in the instructions.

Step 4/Subtotal Activity Fee: Multiply the number of activities (identified in Step 2) times the fee per category (identified in Step 3) to reach a subtotal fee amount. Note: If any of these activities are in a Riverfront Area in addition to another Resource Area or the Buffer Zone, the fee per activity should be multiplied by 1.5 and then added to the subtotal amount.

Step 5/Total Project Fee: Determine the total project fee by adding the subtotal amounts from Step 4.

Step 6/Fee Payments: To calculate the state share of the fee, divide the total fee in half and subtract \$12.50. To calculate the city/town share of the fee, divide the total fee in half and add \$12.50.

To calculate filing fees, refer to the category fee list and examples in the instructions for filling out WPA Form 3 (Notice of Intent).

Massachusetts Department of Environmental Protection
 Bureau of Resource Protection - Wetlands
NOI Wetland Fee Transmittal Form
 Massachusetts Wetlands Protection Act M.G.L. c. 131, §40

B. Fees (continued)

Step 1/Type of Activity	Step 2/Number of Activities	Step 3/Individual Activity Fee	Step 4/Subtotal Activity Fee
Single-Family Dwelling	1	\$500.00	\$500.00 x 1.5

Step 5/Total Project Fee: \$750.00

Step 6/Fee Payments:

Total Project Fee:	<u>\$750.00</u>
State share of filing Fee:	<u>\$362.50</u>
City/Town share of filling Fee:	<u>\$387.50</u>
	a. Total Fee from Step 5
	b. 1/2 Total Fee less \$12.50
	c. 1/2 Total Fee plus \$12.50

C. Submittal Requirements

- a.) Complete pages 1 and 2 and send with a check or money order for the state share of the fee, payable to the Commonwealth of Massachusetts.

Department of Environmental Protection
 Box 4062
 Boston, MA 02211

- b.) **To the Conservation Commission:** Send the Notice of Intent or Abbreviated Notice of Intent; a copy of this form; and the city/town fee payment.

To MassDEP Regional Office (see Instructions): Send a copy of the Notice of Intent or Abbreviated Notice of Intent; a copy of this form; and a copy of the state fee payment. (E-filers of Notices of Intent may submit these electronically.)
