For those of you who like these things, here's a tally of the number of action steps by Objective and the number currently designated "highest", "2nd highest", and ongoing, as well as the number of pointers.

If you subtract the ongoing and pointers from the total number of action steps there are 199 that represent new actions needing resources that aren't already in place. The highest and 2nd highest are both in the neighborhood of 50 action steps.
