With two small special needs kids, I am unable to attend evening meetings.
That said, the thing about the corner that most concerns me is pedestrian and bicycle safety.
The sidewalks (in particular Main Street north from the intersection on the west side) are too narrow.
All of the sidewalks need to meet the ADA requirements.
The driveway openings are wider than necessary.
And foot access to the Roche Bros plaza across the too-wide access road could be improved.

I don't know if it's possible, but extending the plan to include Acton Medical Associates and the adjacent pair of highway access ramps would better connect with the center of town.
