Uniquely Experienced to Save Your Community Money

Community Electricity Aggregation

Massachusetts state law allows municipalities to leverage collective purchasing power to procure electricity in bulk for their residents and businesses.

Program Benefits

- Save your community's residents and businesses money on their electricity bills
- Protect against volatile energy prices
- Continue to receive a single bill from Eversource / National Grid
- Continue to contact Eversource / National Grid with any service issues
- **Local renewable energy** options
- No early termination fees

About Good Energy, L.P.

Good Energy is the leading electricity aggregation consultant in the Commonwealth, representing 24 communities with over 500,000 residents and businesses in Eversource and National Grid.

In 2015, Good Energy received the Energy Leadership Award for its work in pioneering a municipal electricity aggregation model that effectively and affordably increases the amount of local renewable energy on the grid.

In 2016, the Metropolitan Area Planning Council (MAPC) selected Good Energy as their exclusive consultant to design and implement community aggregation programs that will incorporate local renewable energy.
