Project Name:

Cedar Arbor, Kiosk and Culvert for Acton Arboretum

Project Location/Address:

2 Taylor Road, Acton, MA

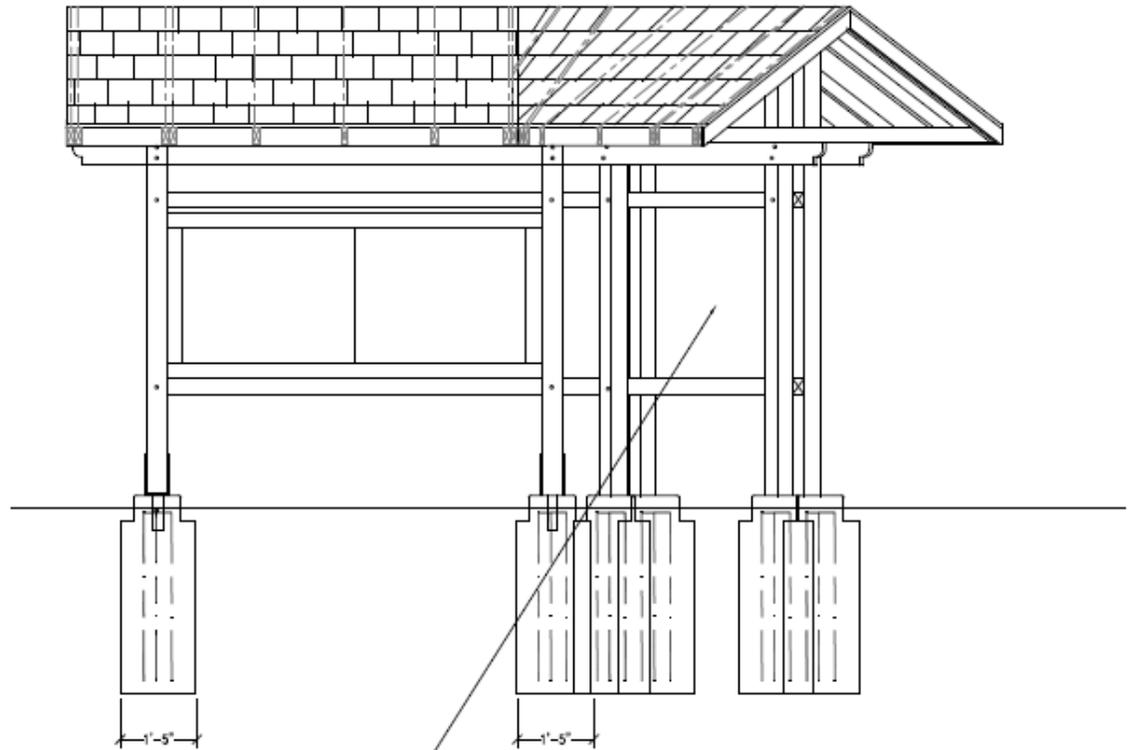

Total Amount Requested: \$24,000**Project Summary:** Purchase materials and install Items A, B and C below:**A) Cedar arbor to replace one that collapsed last winter \$8,185.00**

- Arboretum icon
- Mature trumpet vine (*Campsis radicans*) grows on it
- Accent to the butterfly garden for 30 years
- Cedar Arbor should endure another 30 years
- Materials to be purchased from vendor; Town staff will install.

B) Cedar kiosk for main entrance to the Arboretum \$13,656.25

- Updated design (current kiosk is 30 years old)
- Better aesthetics, more space
- Safer site from cars and trucks
- Improved wheelchair accessibility (height, terrain)
- Materials purchased and constructed by private contractor.

FRONT ELEVATION - (not completed interior panel on short end.

NOTES:

1. ALL WOOD TO BE EASTERN RED CEDAR.
2. ALL HARDWARE TO BE STAINLESS STEEL.
3. CEDAR SHAKES TO BE APPROX. 18" X 1/2" HANDSPLIT WITH AA 5 1/2" EXPOSURE.
4. USE COPPER FLASHING EXPOSED 1" ONE OTHER SIDE FROM UNDER SHAKE CAP.

C) Replace failed 5'x3'x8' concrete box culvert in wildflower trail **\$1,990.00**

- Integral to watershed
- Current unit is cracked and failing
- New culvert will improve accessibility of trail
- Town staff to install. Wetlands filing is complete.

Engineering Department

INTERDEPARTMENTAL COMMUNICATION

To: Conservation Commission

Date: 3/21/2016

From: Engineering Department

Subject: Arboretum – Culvert Design

The Natural Resource Department has asked us to properly size a replacement culvert at the Acton Arboretum. The existing culvert is a 2x2 concrete box culvert which we suggest replacing with a 3x3 box culvert (see attached detail). The proposed culvert will be embedded in the stream bed 1-foot to provide space to replicate a natural stream channel. The proposed box culvert will have a minimal effect on the flow rate and flood level. The area is not within a 100-year flood zone (see attached map). The proposed design nearly mimics the existing conditions.

AVAILABLE SIZES
(H x W) – 3'x3' TO 10'x20'

NOTES:
1. CONCRETE: 5,000 PSI MINIMUM AFTER 28 DAYS.
2. DESIGN PER ASTM C1433 BOX CULVERT
3. ALL REINFORCEMENT PER ASTM A-615-75
4. DESIGN FOR H-20 LOADING

Town Committee (if applicable): Recreation Commission

Project Name: NARA Picnic Pavilion Restroom

Project Location/Address: 25 Ledge Rock Way, Acton, MA

Amount Requested: \$155,000

Project Summary:

Estimated Date for Commencement of Project: September 2017

Estimated Date for Completion of Project: July 2018

Installation of a modular 2-stall handicap accessible restroom across from the NARA Picnic Pavilion. Restrooms will be connected to the existing septic system at the Bathhouse.

The Picnic Pavilion is attracting large formal events to the park, such as weddings, reunions and company outings. Our experience to date shows that it is inconvenient for guests to use portable toilets or walk a distance to the Bathhouse bathrooms, especially in rainy weather. A basic restroom across from Picnic Pavilion would be an added amenity and convenience to offer our patrons.

If this project is not funded, Park patrons would continue to rent portable toilets for events or pay to keep the Bathhouse bathrooms open and staffed. This expanded amenity for patrons will address complaints from patrons about the lack of bathroom availability.

Modular Unit, including installation	\$110,000
Concrete Slab	\$10,000
Utilities	\$15,000
Septic Line and Connection	\$20,000
Total	\$155,000

Recreation has reviewed proposals from two companies, Romtec and CXT, and the Romtec line suits our needs. Romtec has provided standard drawings for building model 2022 with photos. Romtec buildings are pre-engineered packaged building kits that are designed to meet all state and local codes for a site-built permanent structure. Romtec offers the "Design & Supply" of the packaged buildings delivered to the site to be "Installed by Others". Ballpark estimates are below for the "Design & Supply" of the attached standard buildings.

- Model 2022 - \$45K - \$55K

INCLUDED:

DESIGN: Approved Scope of Supply & Design Submittal Documents and Sealed Plan Set (Includes foundation design and all applicable plumbing/mechanical/electrical plans to local code requirements)

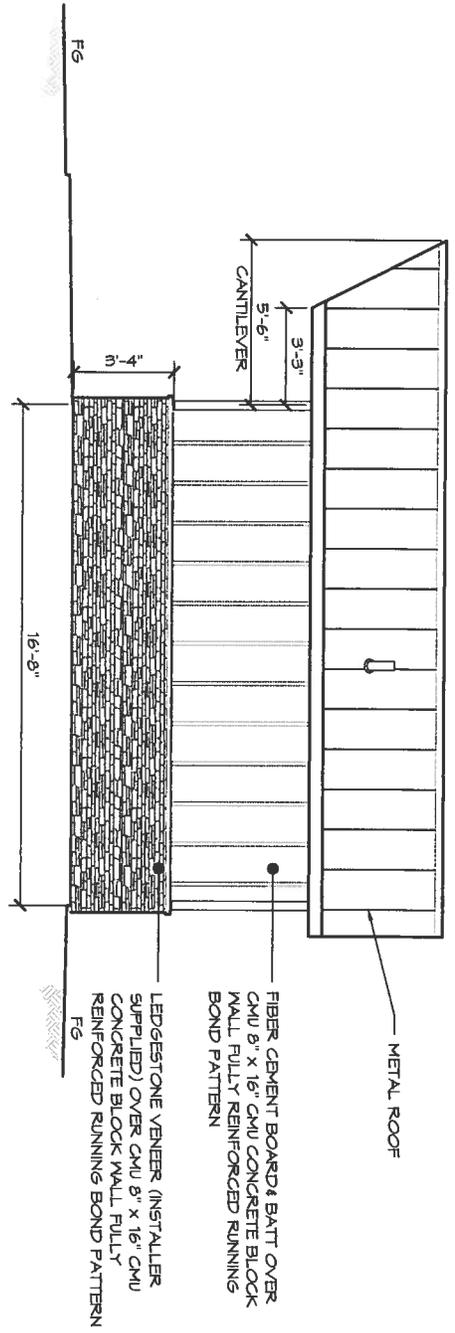

SUPPLY: All Materials/Fixtures necessary to make the unit functional

SHIPPING: To the building site in MA.

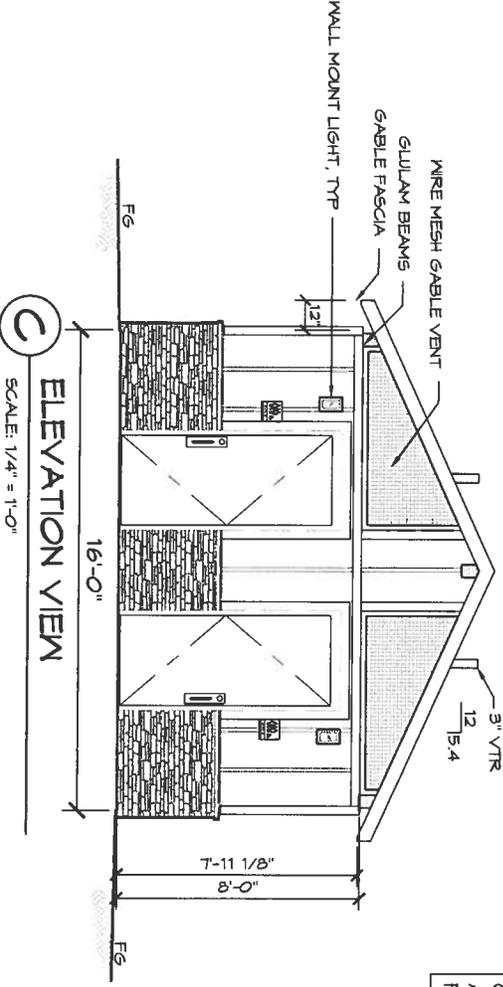

Romtec can design the restroom to match the Picnic Pavilion and any specific usage or dimensional requirements we determine.

- Recreation

Town Committee (if applicable): Recreation Commission

Project Name: NARA Parking Lot Expansion

Project Location/Address: 25 Ledge Rock Way, Acton, MA

Amount Requested: \$160,000

Project Summary:

Estimated Date for Commencement of Project: May 2017

Estimated Date for Completion of Project: June 2018

The Town of Acton seeks **\$160,000.00** to fund this NARA Park improvement project.

- Issues are Park Overuse, Public Safety and the arrival of the Bruce Freeman Rail Trail.
- Park overuse has necessitated that the Recreation Director request police patrols on the weekend to monitor overcrowding.
- The Natural Resources Department has many meetings strategizing with NARA staff about how to control the park when the visitor count was high. One solution was to assign a parking monitor to turn cars away when the parking lot was full or to inform visitors that the park was not admitting more patrons on the beach due to overcrowding, to not exceed the maximum lifeguard:patron ratio. A second solution was to remove park grill areas that were attracting many out-of-town visitors on the weekends.
- A Recreation Park Ranger has monitored park grounds over the past two years to control picnic area use by non-residents by enforcing Park Rules and monitoring parking and the beach. Police would like to see more Recreation staffing brought on to manage the public.
- Many complaints/concerns were voiced in the NARA Master Plan Survey conducted June – September 2015 about non-residents not respecting the park – littering, parking on grass, riding motorcycles on sidewalks, hopping the beach fence to avoid paying to get on the beach, etc.
- \$160,000 will be allocated to expand existing parking at the upper and lower parking lots: construct a 20-car paved parking lot on the site of the existing volleyball court at the lower lot, across from the Bathhouse; construct a 20-car paved parking lot extension along the walking trail between the existing paved upper lot and the Sport Pavilion.
- The opening of the Bruce Freeman Rail Trail in 2017 will significantly increase the number of visitors to the park. The Park must provide dedicated parking spaces for Rail Trail users. Likewise, Park staff will need the expanded parking to reserve parking spaces for picnic area rentals.

Narrative:

This application requests funding for parking expansions at the lower and upper parking lots.

NARA patrons have called and written to the Recreation Director and NARA Master Plan Survey respondents have written to complain that they are very concerned about park overuse by non-residents. We are experiencing increased difficulty controlling vehicle and visitor volume to the park during operating hours. Without tools to control parking, there will be increased resident dissatisfaction. According to Park visitor volume will grow in 2017 when an expected 1,000 users per day during summer weekends are on the Bruce Freeman Rail Trail and flow through NARA.

Parking lot expansion will aid NARA staff and Police in preventing overuse of the park more effectively. In the event this project is delayed, we will experience increased difficulty controlling vehicle access to park sites during operating hours and after hours.

Site Control:

NARA is a municipally owned property, overseen by the Natural Resources Department. See attached deed and maps.

Project Scope:

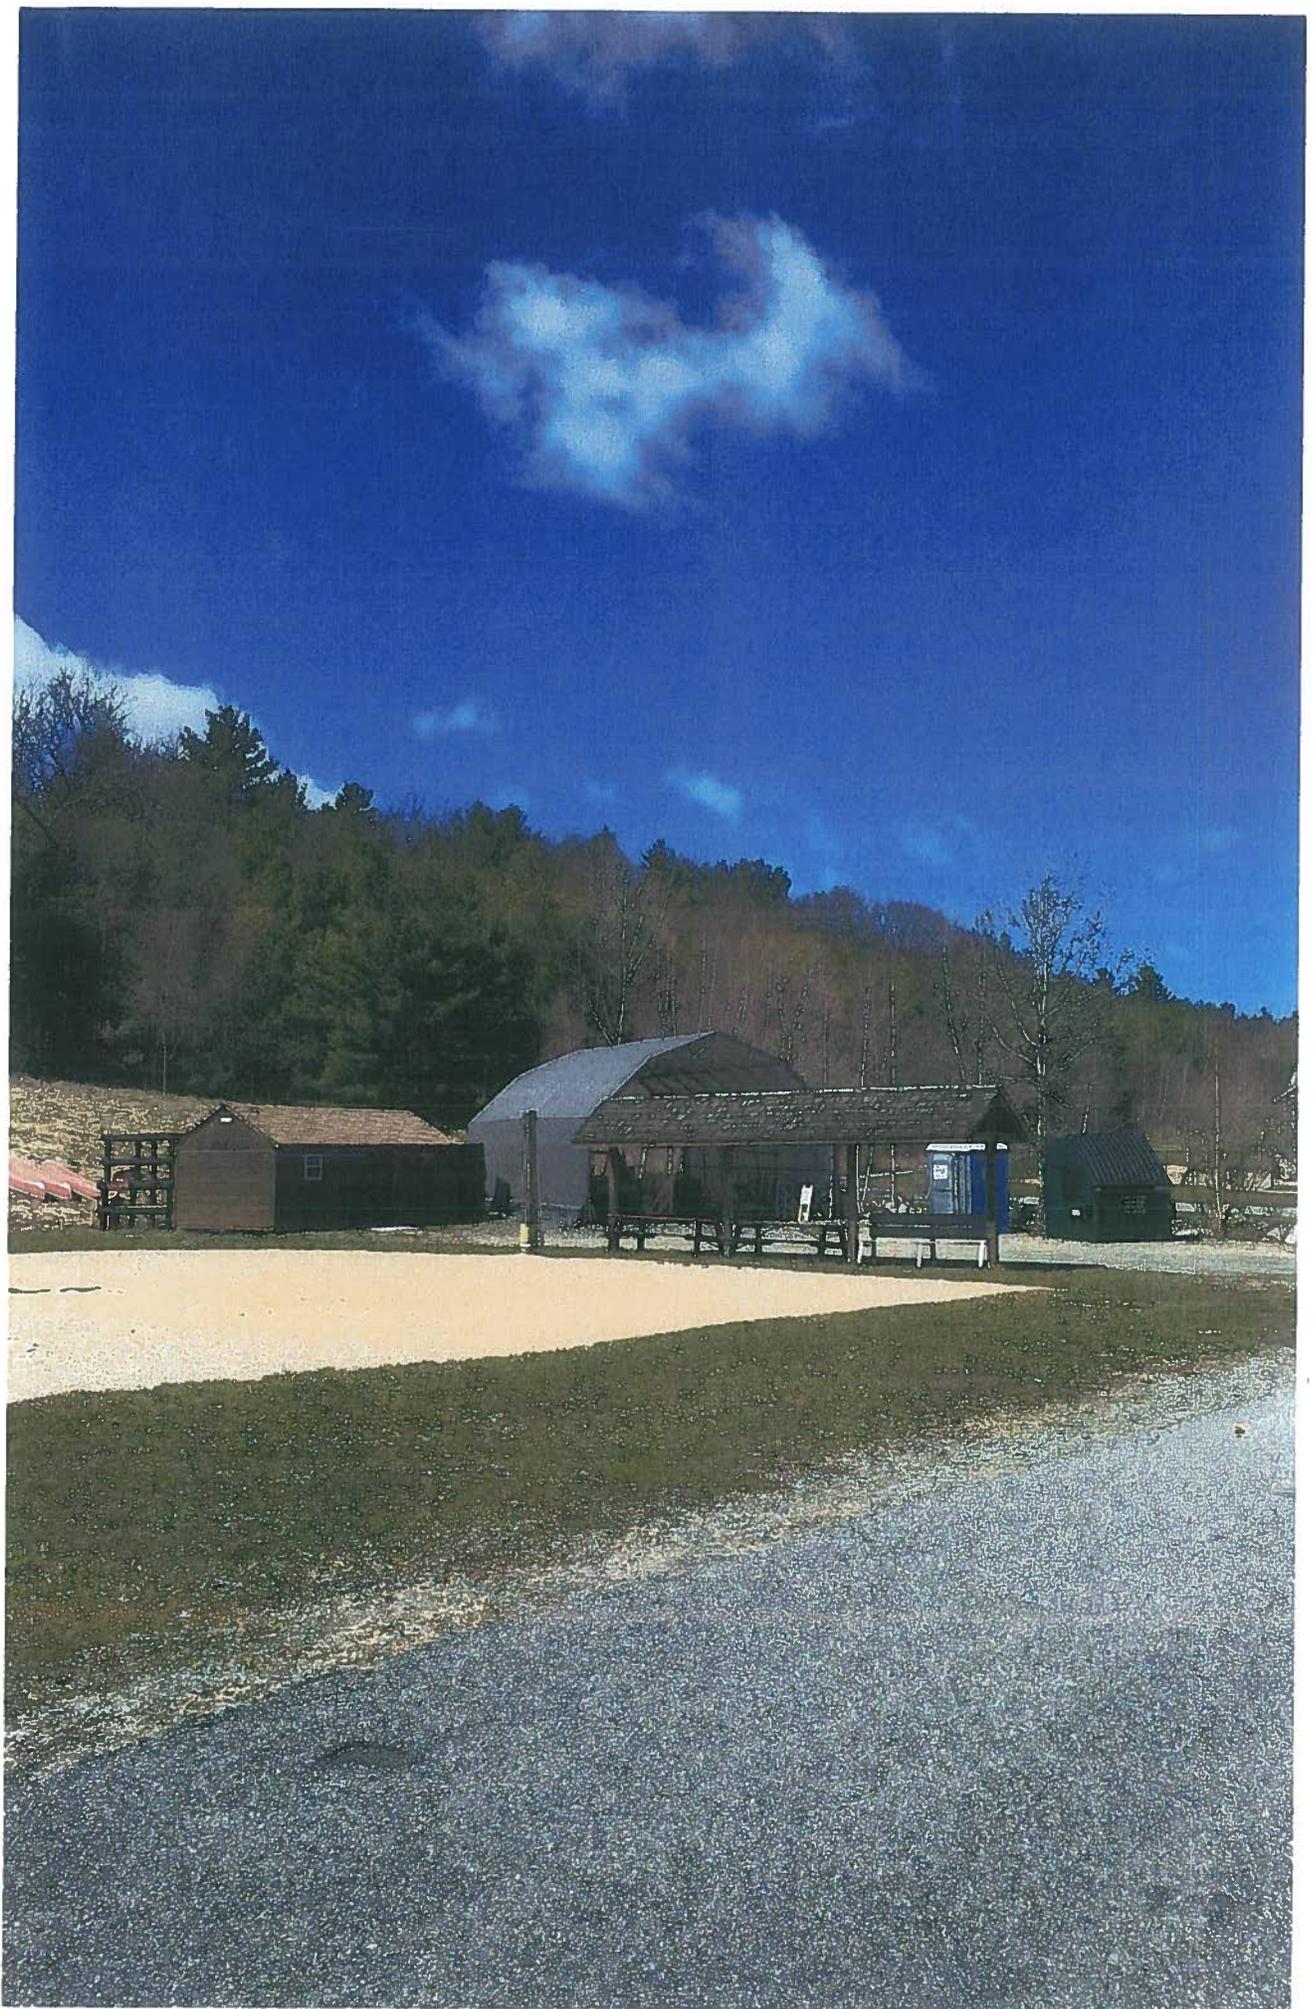

20 car spaces lower parking lot
20 car spaces upper parking lot

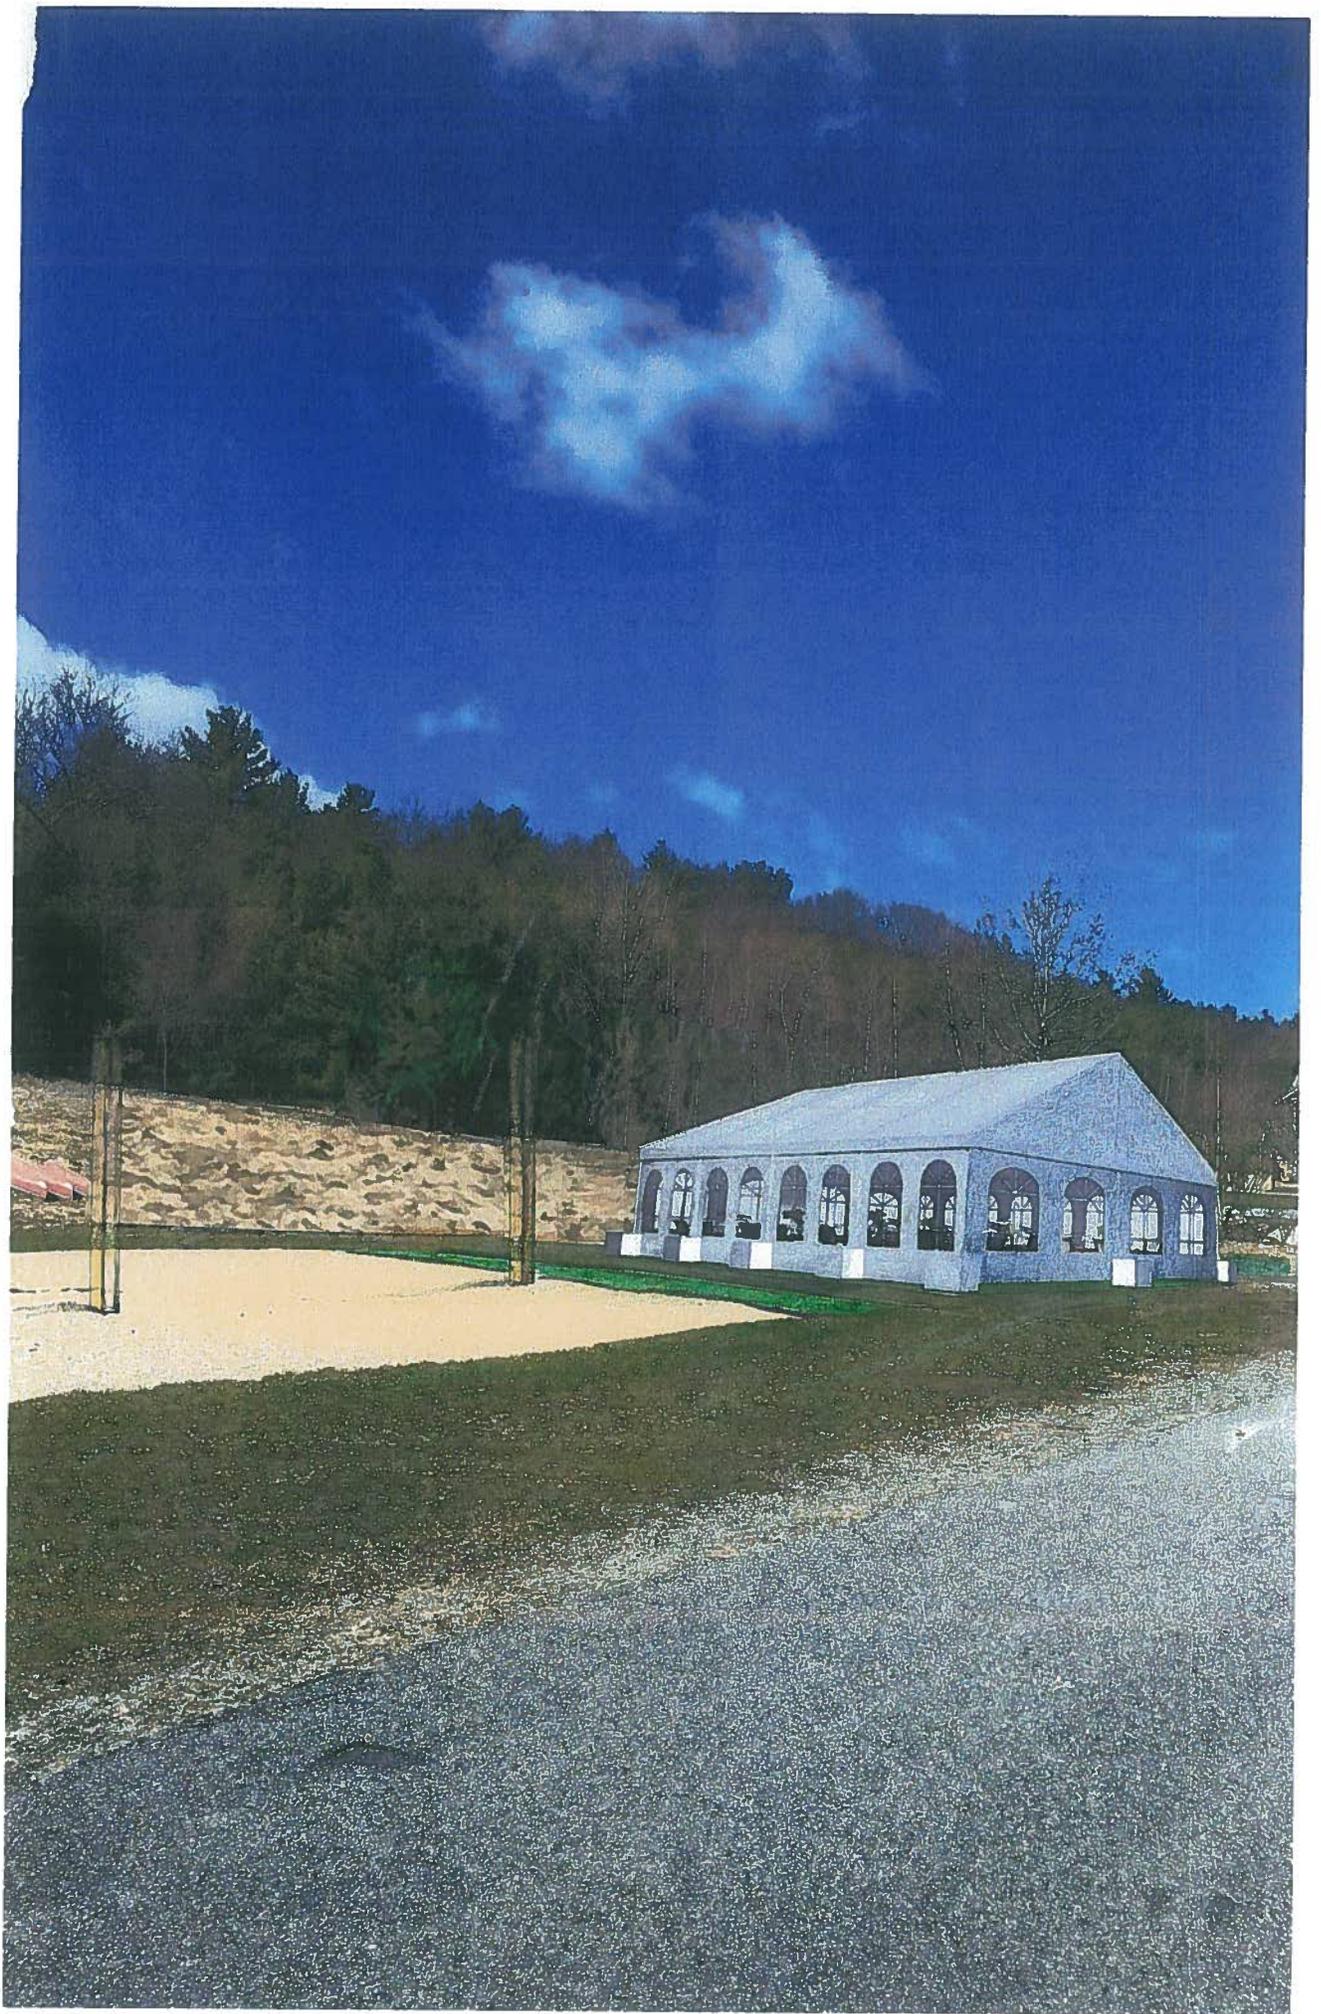

Estimate: ***\$4,000 per car space x 40 spaces = \$160,000***

The Town Engineering Department is mapping the sites of the proposed parking areas and will provide an updated estimate upon completion of their survey.

Neighborhood Outreach:

It is important to note that the NARA Master Plan Survey collected input from 414 respondents from June – September 2015. We received 12 unsolicited written complaints about Park overuse by non-residents. See attached Master Plan Survey Results and 12 highlighted written complaints listed under Question 17. See also email request for action to curb non-resident overuse of park by neighbors Bo and Anping Liu, 8 Monument Place, Acton and the concerns that Holly Henkel, NARA Beach member, related in a phone call to the Recreation Director, recorded in the October 6, 2015 Recreation Commission Minutes under "Citizen Concerns".

Town Committee (if applicable): Recreation Commission

Project Name: NARA Picnic Pavilion Restroom

Project Location/Address: 655 Main St., Acton, MA

Amount Requested: \$40,000

Project Summary:

Estimated Date for Commencement of Project: June 2017

Estimated Date for Completion of Project: August 2017

Veterans Field is a Little League tournament quality twin ballfield, located at the intersection of Route 27 (Main Street) and Route 2A/119 (Great Rd.). Replacement of the retaining wall and walkway to the two ballfields is urgently needed. Timbers that hold back the retaining wall that backs up to the fields have rotted and metal pins are exposed where the wood has disintegrated. The current retaining wall poses a safety hazard to field users and needs replacement. The wall is no longer retaining the hillside, it is listing forward. The stone dust walkway that provides access to the twin ballfields requires resurfacing. The walkway has been overgrown with vegetation and does not meet ADA standards.

Quotes from New England Hardscapes and Forte Landscaping comprise the work proposed:

Wall Replacement \$35,000 *New England Hardscapes*

Stone Dust Path \$ 5,000 *Forte Landscaping*

Total \$40,000

RE: Veterans Field Retaining Walls

We are pleased to submit specifications and costs for:

Retaining walls:

1. REMOVE EXISTING LANDSCAPE TIMBER WALLS AND PROPERLY DISPOSE.
 2. EXCAVATE AREA FOR WALLS AND INSTALL FOOTINGS WITH COMPACTED DENSE GRADE GRAVEL PER WALL BLOCK MANUFACTORERS SPECIFICATIONS.
 3. INSTALL APPROXIMATELY 462 SQ. FT. OF NICOLock ALTA WALL SYSTEMS OR EQUIVILANT.
 4. INSTALL 4" REFERRATED DRAINAGE PIPE BEHIND WALL, INSTALL GEO-TEXTILE FABRIC AND BACK FILL WITH ¾" CRUSHED STONE.
 5. SUPPLY GRADING OF AREA IMMEDIATELY BEHIND WALL.
- TOTAL \$34,239**

NOTES:

- New England Hardscapes cannot be responsible for any damage to the access path caused by excessive weight and normal construction wear and tear, broken electrical or gas-lines not clearly marked or broken plumbing lines not buried below the industry standard of one foot.

All material is guaranteed to be as specified. All work to be completed in a skillful manner according to standard practices. Any alteration or deviation from above specifications involving extra costs will be executed only upon written orders, and will become an extra charge over and above the estimate. All agreements contingent upon strikes, accidents, or delays beyond our control. Owner to carry fire, tomado, and other necessary insurance. Our workers are fully covered by Workmen's Compensation Insurance.

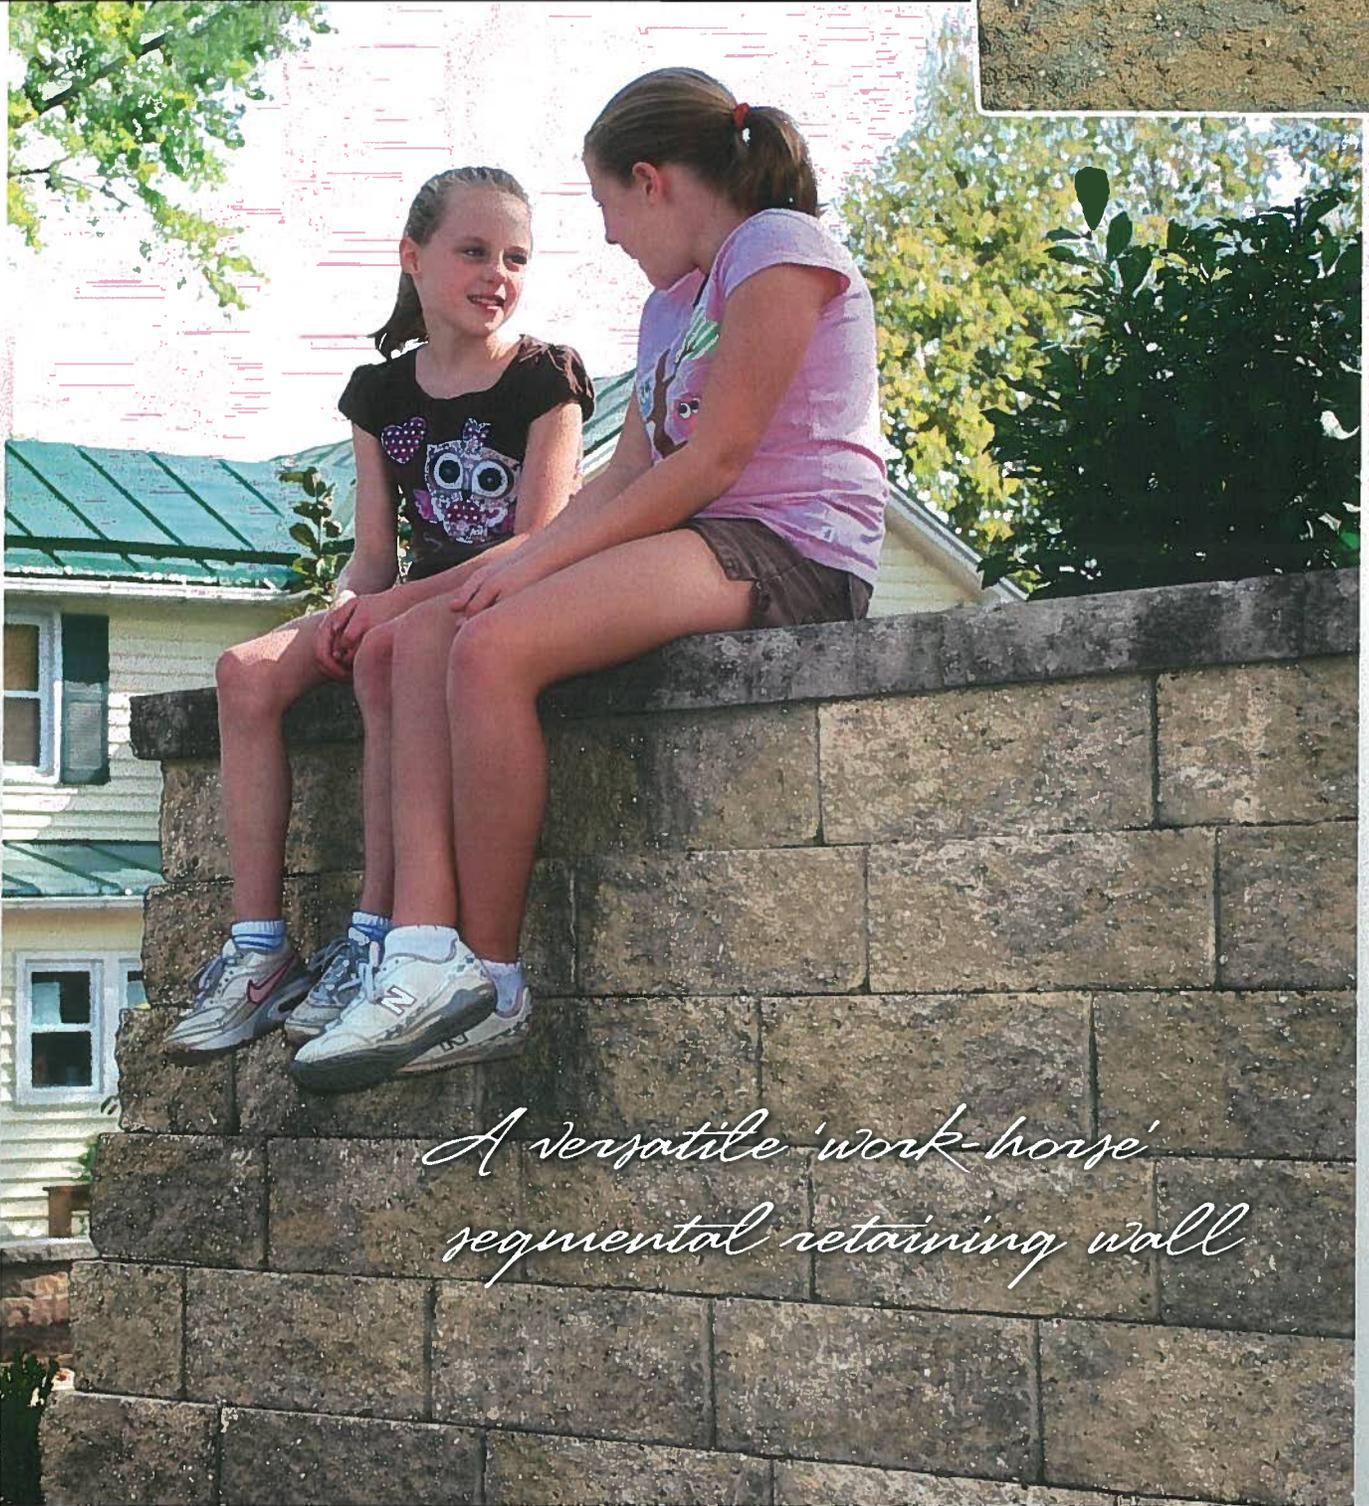

Authorized Signature: Richard W. Capachione

Note we may withdraw this proposal if not accepted within 21 days.

ACCEPTANCE OF PROPOSAL – The prices, specifications and conditions are satisfactory and are accepted. You are authorized to do the work as specified.

Re: Stone Dust Path
At: Veteran's Field

Dear Cathy,

I am pleased to present to you my proposal to install a stone dust path along the new segmented wall. The scope of work is based solely on your email dated 4/13/16 and our recent site meeting. It did not include, any other bid specifications, documents or prevailing wages rates. All of which, could increase the cost of the project. The scope of the work, included in our proposal is as follows;

Base Bid A- Install a 5' wide X 350 sq/ft stone dust path along the new segmented wall:

- 1) Lay out the path 5' wide X 350 sq/ft, along the segmented wall.
- 2) Excavate 8" deep & dispose of the material.
- 3) Supply & install 7" of dense grade c-run, graded & compacted.
- 4) Supply & install 1" of stone dust, fine graded & compacted.
 - Town to obtain any permits, bond or fees required by all parties involved.
 - The town is responsible for surveying and marking the property lines. Removal and/or replacement of any materials due to errors or lack of markings will be done at an additional charge.
 - Town shall mark location(s) for DigSafe and accepts all responsibility for errors.
 - The town is responsible for marking all underground obstructions, and putting Forte on the DigSafe number. Forte cannot & shall not be held liable for damage done during construction.

Price for Base Bid A (based on prevailing wage not to exceed \$ 51.75) \$ 4,650.00

This proposal is subject to review after 30 Days, no exceptions.

This proposal is based on having an open, level, unobstructed & accessible site, for machines, trucks & the storage of materials.

Verification of the measurements is the responsibility of town. Adjustments to the site, the equipment, work done by others, delays or return trips due to errors will be done at an additional charge.

The town is responsible for surveying & marking the property lines. The removal and/or replacement of any materials, due to errors or lack of markings will be done at an additional charge.

The town is responsible for marking all underground obstructions and verifying DigSafe markings. Forte cannot & shall not be held liable for damage done during construction.

Return trips due to improper work done by others, or delays caused by any parties involved, for any reason, will be an additional charge.

May 18, 2016

Page 2 of 2

Re: Stone Dust Path

At: Veteran's Field

The owner takes full responsibility for those tasks as well as any other tasks provided by others. Including but not limited to the security of the site for any reason including but not limited to the security of the site for any reason including public safety, vandalism or theft, from the time the project begins, until the project is considered complete. Accepting this proposal, the owner & O'Brien agree to hold Forte Landscaping, its' officers and employers, harmless and pay to defend them for the design, lay out (including on site changes), appropriateness of the equipment for whom it is intended to serve. As well as any person that can gain access to the site. Including all work done by others, lapse in work done by Forte, scheduling, properly securing & maintaining security on the site until the resilient surfacing has been installed and the project is considered complete.

This proposal does not include:

- 1) The prevailing wage, for any task required. Therefore, the owner accepts all responsibility & costs including but not limited to, legal fees, corrective wages, taxes, workers compensation, fines, penalties & fees, if this project is found to require a prevailing wage in excess of \$ 51.75 for any task this project requires.
- 2) The cost(s) of, or obtaining any permits, bonds, licenses, fees or police details.
- 3) The cost of any additional insurance coverage, verbiage or requirements, other than what already exists.
- 4) **Any hand excavation or machine excavation other than what is specifically noted which may be none. Including pumping, excavation, removal, disposal, or replacement of any obstructions above or below grade. Including but not limited to water, large rocks, ledge, clay, stumps, roots, concrete, asphalt or hazardous waste.**
- 5) Any costs due to special considerations for delivery or storage of the equipment, resilient surfacing, concrete, or any materials to the site, other than what is specifically noted which may be none.
- 6) Any costs for special considerations, deadlines, including weekend or holiday installations or delays due to bus schedules or the owner's requirements in scheduling or delaying the work, except for those specifically noted.
- 7) Any site preparation, pumping, hay bales, silt fencing, conservation conditions or modifications due to drainage problems, or grade issues that may call for the leveling, retaining or draining of the site, except for those specifically noted.
- 8) The installation of any resilient surfacing other than what is specifically note, which may be none.
- 9) Any accessibility to the site or structure, including cement pads, curb cuts, walkways, etc. other than what is specifically noted.
- 10) The rehabilitation of the site, including but not limited to seeding, sodding, grading etc.
- 11) Work to be done during our normal work hours- Mon.-Fri. 6:00 – 2:30. Delays, return trips, weekends & holidays, will be an additional charge!

Sincerely,

Thomas A. Forte, president
