**Subject:** OSRP

Roland,

Below are my comments on the Open Space and Recreation Plan. I have only been able to read up to chapter 4.

Chapter 2 (page 2-3) section 2C Accomplishments first bullet point “Couette/Simeone” should list out the number of acres.

Chapter 3 (page 3-7) section 3.A.4.2 CPA – Does not mention Recreation and it should. Also each of the lands that have been purchased with CPA monies should include the acreage. I would remove the \$400,000 in the last sentence and after allocated should read monies each year since the CPA was adopted in Acton.

I also found that the document mentions aspects over and over and over again, which I find unnecessary and adds length to document that would not otherwise be there. Maybe the redundancy should be removed.

Also please pass this on to Tom Tidman: While reading the OSRP I found it interesting that the new parking surface at Nara (near the Miracle Field) is porous pavement, so if it is being used there why can't it be used at the arboretum?

Thanks,

**Roland Bourdon** | Commissions Analyst | **National Financial Services, LLC**
